

## Date and Time

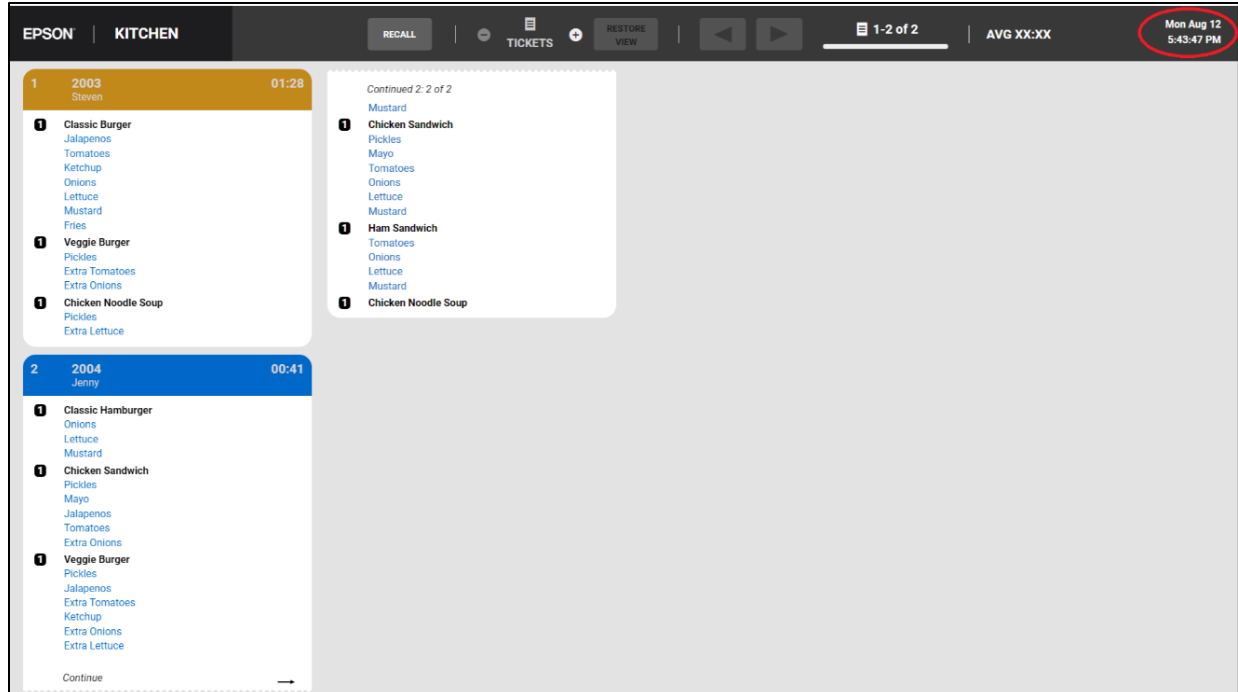

### About this Guide

This guide consists of 3 sections:

- **Overview** – Description of what this is in a TrueOrder™ Kitchen Display System (KDS).
- **How to Configure** – A procedure that can be followed to configure the TrueOrder KDS system date and time.
- **Appendix** – Options for time configuration.

## Overview

The date and time are displayed at the top right of each KDS display and can be configured to show in the local time zone.

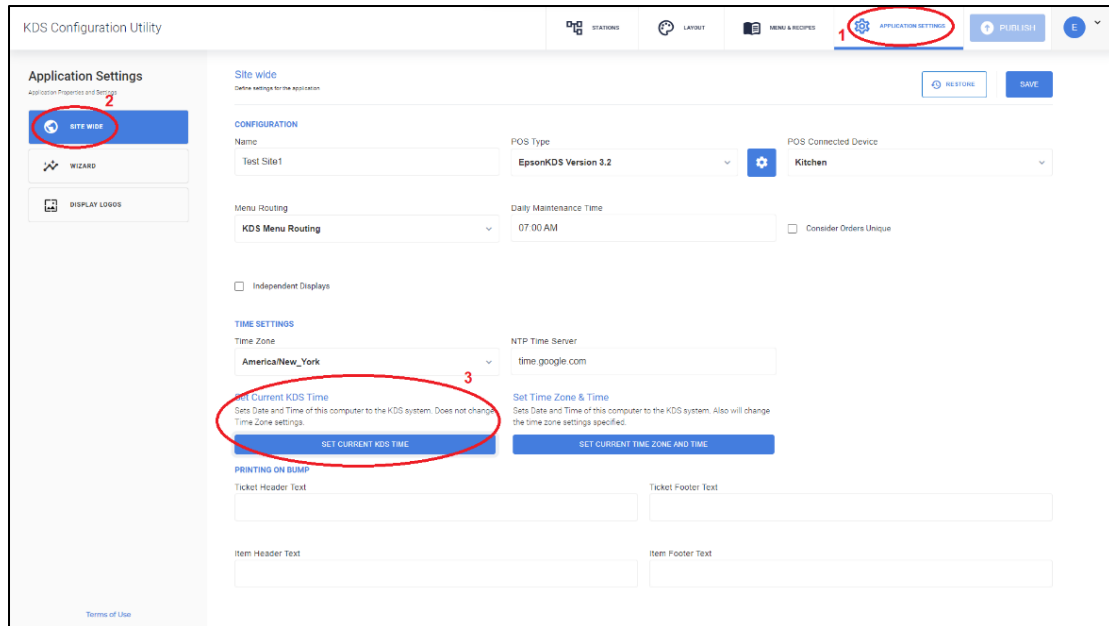

**Figure 1: KDS Showing Time**

# How to Configure

This procedure sets the current KDS date and time to that of the PC that is running the configurator. This assumes that you already have a TrueOrder KDS system working.

1. Select **Application Settings**.
2. Click **Site Wide**.
3. Click **Set Current KDS Time**.

**Figure 2: Configuring Time Settings**

4. Time settings are transmitted to the POS Connected device first and then propagated to all devices in the system if there are additional devices. This can take a few minutes to update.

# Appendix

## Time Settings

**Time Zone:** The system supports time zone settings. Choose your time zone from the drop-down menu. This will update the master device (If selected) to the new time zone settings and the current local time.

**NTP Time Server:** Specifies NTP Time Server.
