Follow the on-screen instructions to begin installation and accept the software license conditions.

1. **Windows**
   - **First you’ll install Adobe Photoshop Elements**, then your scanner software.
   - **Photoshop Elements**
     - Insert the Adobe Photoshop Elements CD-ROM in the CD-ROM or DVD drive. The installer starts automatically.
     - Double-click the Adobe Photoshop Elements icon.
     - Double-click the Install Photoshop Elements icon.
     - Follow the on-screen instructions to begin installation, and accept the software license conditions.

2. **Macintosh**
   - First you’ll install Adobe Photoshop Elements, then your scanner software.
   - **Photoshop Elements**
     - Insert the Adobe Photoshop Elements CD-ROM in the CD-ROM or DVD drive. The installer starts automatically.
     - Make sure US English is selected and click Next.
     - Follow the on-screen instructions to begin installation, and accept the software license conditions.

3. **Scanner Software for Mac OS X**
   - Insert the scanner software CD-ROM in the CD-ROM or DVD drive.
   - Double-click the EPSON CD-ROM icon and then double-click the English folder.
   - Enter your Administrator name and password and click OK.
   - When you see the EPSON Scan Installer window, click Install, then follow the on-screen instructions.
   - When installation is complete, continue with the instructions under “Install SilverFast.”

4. **Install SilverFast (Windows and Macintosh)**
   - Insert the LaserSoft SilverFast SE CD-ROM in the CD-ROM or DVD drive. The installer starts automatically.
   - In Mac OS X (or on systems where the installer doesn’t start automatically), double-click the Autorun icon in the CD-ROM folder.
   - Select your language and click Continue.
   - Click the Install SilverFast SE icon.
   - Select the type of plug-in you want to install:
     - Photoshop Plugin Installer (for Adobe Photoshop or Photoshop Elements)
     - TWAIN Plugin Installer (for other TWAIN-compliant applications)
   - Then click Install SilverFast.
   - Continue with the instructions under “Install SilverFast.”

5. **Register your scanner as instructed.** At the last screen, click Install.

6. **When you see a message asking you to select a language, click English.**

7. At the Software Installation screen, click Install.

8. Read the license agreement, then click Agree.

9. Follow the on-screen instructions to install each program. After each one is installed, click Next or Finish to continue.

10. Continue with the instructions under “Install SilverFast.”

IMPORTANT: Leave the sticker in place until you are instructed to remove it.

NOTE: If you’ll be connecting your scanner using IEEE 1394 (FireWire® or iLink™), you need to purchase an IEEE 1394 cable (not included).

IMPORTANT: Leave the sticker in place until you are instructed to remove it.

Note: If you don’t already have Adobe Photoshop or Photoshop Elements on your computer, install Photoshop Elements from the CD-ROM included with your scanner software.

Be sure to close all open programs and turn off any virus protection programs.

Install Presto! PixExpress if necessary. Then click Install.

Click Install to continue.

Note that EPSON Scan is already installed.

If necessary, double-click the EPSON CD-ROM icon to open it.

When your Macintosh restarts, double-click the EPSON CD-ROM icon and then double-click the EPSON Scan Installer icon.

When you see the EPSON Scan Installer window, click Install, then follow the on-screen instructions.

Register your scanner as instructed. At the last screen, click Install.

Click this icon.

When you see a message asking you to select a language, click English.

When installation is complete, continue with the instructions under “Install SilverFast.”

To continue, note that EPSON Scan is already installed.

When you’re asked for a software serial number, enter the number printed on the sticker attached to the CD-ROM sleeve.

Follow the on-screen instructions to install the software.

When you’re finished, click Quit.

If you don’t have Acrobat Reader, you can install it from the CD-ROM.

When you’re asked for a software serial number, enter the number printed on the sticker attached to the CD-ROM sleeve.

Follow the on-screen instructions to install the software.

When you’re finished, click Quit.

If you don’t have Acrobat Reader, you can install it from the CD-ROM.

Install the Software

Congratulations! You’re now set to scan. Start with a blank sheet of paper or transparency, and scan away. When you’re finished, close your browser.
Unpack Your Scanner

1. Make sure you have everything:
   - Scanner
   - CD-ROM with EPSON® Scan driver, software, and electronic manuals
   - LaserSoft SilverFast® SE CD-ROM
   - Adobe® Photoshop® Elements 2.0 CD-ROM

   Note: If you’re connecting your scanner using IEEE 1394 (FireWire® Link(TM)), you need to purchase an IEEE 1394 cable (not included).

2. Remove all the packing tape, but leave the large sticker in place until instructed to remove it.

3. Insert the hinges on the cover into the square holes at the back of the scanner. (Make sure the cable does not get caught under the scanner cover.) Close the cover.

Install the Software

1. Wait! You must install your software before connecting the scanner to your computer. The installation process may take up to 15 minutes.

2. Be sure to close all open programs and turn off any virus protection programs.

3. If you don’t already have Adobe Photoshop or Photoshop Elements on your computer, install Photoshop Elements from the CD-ROM included with your scanner. To view the Photoshop user manuals, you’ll need Adobe Acrobat Reader. Double-click the icon in the CD-ROM folder.

   • Photoshop Elements icon
   • Adobe Acrobat Reader icon

4. First you’ll install Adobe Photoshop Elements, then your scanner software.

Windows®

First you’ll install Adobe Photoshop Elements, then your scanner software.

Photoshop Elements

1. Insert the Adobe Photoshop Elements CD-ROM in the CD-ROM or DVD drive.

2. Double-click the or CD-ROM icon and double-click the English folder.

3. Double-click the Install Photoshop Elements icon.

4. Follow the on-screen instructions to begin installation, and accept the software license conditions. In Mac OS X, enter your Administrator name and password, then click OK.

Macintosh®

First you’ll install Adobe Photoshop Elements, then your scanner software.

Install SilverFast (Windows and Macintosh)

1. Insert the LaserSoft SilverFast SE CD-ROM in the CD-ROM or DVD drive. The installer starts automatically.

2. Select the language and click Continue.

3. Click the Install SilverFast SE icon.

4. Choose a location and click Install.

5. Click Install and follow the on-screen instructions to install each program. After each one is installed, click Quit to continue. Note that EPSON Smart Panel installs in several steps. If you have PDA (Palm™ or Pocket PC) software on your computer, Presto! PixExpress will be installed.

6. If you don’t have Acrobat Reader, you can install it from the CD-ROM. When the EPSON Scan installation is complete, click Restart. Don’t remove your CD-ROM. After your Macintosh restarts, you can install the rest of your software.

7. When your Macintosh restarts, double-click the EPSON CD-ROM icon to open it, if necessary, then double-click .

8. Click Install the on-screen instructions to install the software.

9. When you’re finished, click Quit.

10. Register your scanner as instructed. At the last screen, click Done or close your browser.

   Continue with the instructions under “Install SilverFast.”

EPSON Perfection® 3200 Photo

Unpack Your Scanner

1 Make sure you have everything:

- Scanner
- CD-ROM with EPSON® Scan driver, software, and electronic manuals
- LaserSoft® SilverFast® SE CD-ROM
- Adobe® Photoshop® Elements 2.0 CD-ROM

Note: If you’re connecting your scanner using USB, you may have to install a USB cable.

2 Insert the Adobe Photoshop Elements CD-ROM in the CD-ROM or DVD drive. After installation is complete, continue.

3 Make sure you have everything:

- Software license conditions.
- DVD drive. The installer starts automatically.

Install the Software

1 Insert the scanner software CD-ROM in the CD-ROM or DVD drive.

2 When you see the screen, click the Adobe Photoshop Elements icon. Continue with the instructions under "Install SilverFast."

3 When you see the Adobe Photoshop Elements button, click Install. When you see the EPSON Scan Installer, click Install.

4 When you’re asked for a software serial number, enter the number printed on the sticker attached to the CD-ROM sleeve.

5 Follow the on-screen instructions to install the software.

Macintosh®

First you’ll install Adobe Photoshop Elements, then your scanner software.

Photoshop Elements

1 Insert the Adobe Photoshop Elements CD-ROM in the CD-ROM or DVD drive. The installer starts automatically.

2 Double-click the or icon and double-click the English folder.

3 Double-click the Install Photoshop Elements icon.

4 Follow the on-screen instructions to begin installation and accept the software license conditions. In Mac OS X, enter your Administrator name and password, then click OK.

5 Follow the on-screen instructions to install each program. After each one is installed, click Quit to continue. Note that EPSON Smart Panel™ installs in several steps. If you have PDA (Palm™ or Pocket PC) software on your computer, Presto! PixExpress will be installed.

6 Close Exit. The EPSON Product Registration screen appears.

7 Register your scanner as instructed. At the last screen, click Done or close your browser. Continue with the instructions under "Install SilverFast."

Install SilverFast (Windows and Macintosh)

1 Insert the LaserSoft SilverFast SE CD-ROM in the CD-ROM or DVD drive.

2 Select your language and click Continue.

3 The installer starts automatically. In Mac OS X (or on systems where the installer doesn’t start automatically), double-click the Autorun icon in the CD-ROM folder.

4 Select the type of plug-in you want to install:

- Photoshop Plugin Installer (for Adobe Photoshop or Photoshop Elements)
- TWAIN Plugin Installer (for other TWAIN-compliant applications)

5 Click Install. If you don’t have Acrobat Reader, you can install it from the CD-ROM. When you’re finished, click Close.

6 When you see the message asking you to select a language, click English.

7 When the Software Installation screen appears, click Install.

8 Click Install and follow the on-screen instructions to install each program. After each one is installed, click Quit to continue. Note that EPSON Smart Panel installs in several steps. If you have PDA (Palm) software on your computer, Presto! PixExpress will be installed.

9 Click Exit. The EPSON Product Registration screen appears.

10 Register your scanner as instructed. At the last screen, click Done or close your browser. Continue with the instructions under "Install SilverFast."

Scanner Software for Mac OS X

1 Insert the scanner software CD-ROM in the CD-ROM or DVD drive.

2 Double-click the EPSON Scan Installer icon.

3 Enter your Administrator name and password and click OK.

4 When you see the EPSON Scan Installer window, click Install, then follow the on-screen instructions.

5 When you see the reference guide, click Install, then follow the on-screen instructions.

Scan driver, software, and electronic manuals.
Unpack Your Scanner

1. Make sure you have everything:
   - Scanner
   - USB cable
   - LaserSoft SilverFast SE CD-ROM
   - CD-ROM with EPSON® software
   - Transparency unit
   - Film holders

2. Remove all the packing tape, but leave the large sticker in place until instructed to remove it.

3. Insert the hinges on the cover into the square holes at the back of the scanner. (Make sure the logo does not get caught under the scanner cover.) Close the cover.

4. When you see this screen, click the Adobe Photoshop Elements button.

5. Follow the on-screen instructions. When you’re asked for a software serial number, enter the number printed on the sticker attached to the CD-ROM sleeve.

6. If you don’t have Acrobat Reader, eject the CD-ROM and repeat steps 1 – 3. Then select Adobe Acrobat Reader to install it. Continue with the instructions below to install the scanner software.

Scanner Software

1. Insert the scanner software CD-ROM in the CD-ROM or DVD drive. The installer starts automatically.

2. Follow the on-screen instructions to install the software.

3. When you see a message asking you to select a language, click English.

4. At the Software Installation screen, click Install.

8. When you see this screen, click the Finish button.

9. Continue with the instructions under "Install SilverFast."

Start Here

EPSON Perfection® 3200 Photo

Follow the on-screen instructions to begin installation and accept the software license conditions. In Mac OS X, enter your Administrator name and password, then click OK.
Connect the Scanner
After your software is installed, it's time to get connected.

1 Remove the sticker from the transportation lock. Use a coin to turn the lock clockwise one-quarter turn to unlock the scanner carriage.

2 Remove the sticker from the back of the scanner.

3 Connect the cable for the built-in transparency unit to the mound connector on the back of the scanner. You may need to raise the scanner cover and twist the cable to insert it.

4 Connect either the USB interface cable that comes with your scanner or an optional IEEE 1394 (FireWire) cable. Don't connect both.

If you're using USB...
Plug the white square end of the USB cable into the scanner's USB port. Then plug the white square end into any available USB port on your computer or USB hub. If you're using IEEE 1394 (FireWire)...
Plug one end of the IEEE 1394 cable (not included) into the scanner's IEEE 1394 port. Then plug the other end into the IEEE 1394 (FireWire, iLink) port on your computer.

Note: Your scanner may not work correctly if you use a USB cable other than the one supplied by EPSON or if you connect your scanner to a multi-level USB hub system.

Scanner Basics
Scanning With Photoshop

1 Raise the scanner lid and place your photo face down on the glass.

2 Start Adobe Photoshop Elements.

Note: To fine-tune images, you can use EPSON Scan to make settings and see a preview before scanning. See your on-screen Scanner Reference Guide for details.

You can use Photoshop Elements to edit, enhance, save, and print your file.

3 Click the option of your choice to scan:
   - Copy: Make a quick copy, or several copies, of your document. Printing with EPSON color ink jet printers is recommended.
   - Photo Print: Make prints from your photos, negatives, and slides. Printing with EPSON color ink jet printers is recommended.
   - Scan to Application: Scan an image and open it in any supported application.
   - Scan to E-mail: If you have a MAPI-compliant e-mail program, scan an image and automatically attach it as a file to a new message.
   - Scan to OCR: Scan a text document and open it in your word processing application, then edit it and save it as a new file.
   - Scan to PDF: Automatically format and scan a photo and send it to your Palm or Pocket PC device.
   - Scan to P.I.M: File: Save images with an expanded color space and additional P.I.M. (PRINT Image Matching) enhancements for printing with a P.I.M.-enabled printer and P.I.M. application.
   - Scan to Web: Scan your photos and upload them to the EPSON PhotoCenter website to share them with family and friends. To sign up for an account, go to http://photo.epson.com.

4 Follow the on-screen instructions to use the Smart Panel options.
   - On many Smart Panel screens, you'll need to click Finish to continue scanning and launch or start other programs. See your on-screen Smart Panel User's Guide for detailed instructions.

EPSON Smart Panel opens on your computer.

5 Place the film holder in the upper right corner, as shown.

6 Place the film holder in the upper right corner, as shown.

7 Close the scanner lid.

Note: Make sure the notched area at the top of the film holder is clear to ensure an accurate scan.

Placing Film on the Scanner
To scan film, you'll need to remove the reflective document mat and place the film in a holder.

Note: To scan slides or medium- or large-format film, follow these steps but use the correct holder. See your on-screen Scanner Reference Guide for detailed instructions.

1 Place your photo or document face down on the glass in the top right corner, then close the lid. (If you are scanning film or slides, see "Using EPSON Smart Panel".)

2 Press the Start button on your scanner.

3 Carefully pop the film cover open of the film holder (Don't remove the cover from the large format film holder, just lift it.)

4 Slide the film into the film holder, with the shiny base side facing down.

5 Replace the film cover and press it down until it clicks.

Using EPSON Smart Panel
You can use your scanner's Start button to open EPSON Smart Panel, which gives you several options for scanning. You can also open it by pressing the I (Smart Panel) button on your computer.

1 Place your photo or document face down on the glass in the top right corner, then close the lid. (If you are scanning film or slides, see "Using EPSON Smart Panel").

2 Press the Start button on your scanner.

3 Click the option of your choice to scan:
   - Copy: Make a quick copy, or several copies, of your document. Printing with EPSON color ink jet printers is recommended.
   - Photo Print: Make prints from your photos, negatives, and slides. Printing with EPSON color ink jet printers is recommended.
   - Scan to Application: Scan an image and open it in any supported application.
   - Scan to E-mail: If you have a MAPI-compliant e-mail program, scan an image and automatically attach it as a file to a new message.
   - Scan to OCR: Scan a text document and open it in your word processing application, then edit it and save it as a new file.
   - Scan to PDF: Automatically format and scan a photo and send it to your Palm or Pocket PC device.
   - Scan to P.I.M: File: Save images with an expanded color space and additional P.I.M. (PRINT Image Matching) enhancements for printing with a P.I.M.-enabled printer and P.I.M. application.
   - Scan to Web: Scan your photos and upload them to the EPSON PhotoCenter website to share them with family and friends. To sign up for an account, go to http://photo.epson.com.

4 Follow the on-screen instructions to use the Smart Panel options.
   - On many Smart Panel screens, you'll need to click Finish to continue scanning and launch or start other programs. See your on-screen Smart Panel User's Guide for detailed instructions.

EPSON Smart Panel opens on your computer.

Note: Make sure the notched area at the top of the film holder is clear to ensure an accurate scan.

Closing the scanner lid...
Close the scanner lid.

Problems?
First, check the light on the scanner.

Note: If the red light is flashing, press the Cancel button and follow the steps on the other side of this sheet. Disconnect the scanner before installing the software.

1 Make sure the transparency unit cable is connected to the option interface connector (see step 3 in "Connect the Scanner").

2 Lift the scanner lid all the way up and pull the reflective document mat up and off of the scanner lid, as shown.

3 Carefully pop the film cover open of the film holder (Don't remove the cover from the large format film holder, just lift it.)

4 Slide the film into the film holder, with the shiny base side facing down.

5 Replace the film cover and press it down until it clicks.

You see an error message when you try to scan, or the scanner doesn't scan.

Click Cancel and follow the steps on the other side of this sheet. Disconnect the scanner before installing the software.
After your software is installed, it's time to get connected.

1. After your software is installed, it's time to get connected.
2. Connect the cable for the built-in transparency unit to the mound connector on the back of the scanner. You may need to raise the scanner cover and twist the cable to insert it.
3. If you're using USB...
   - Plug one end of the IEEE 1394 cable (not included) into the scanner's connector on the back of the scanner. You may need to raise the lock clockwise one-quarter turn to unlock the scanner carriage.
   - Remove sticker
   - Make sure the notched area at the top of the film holder is clear to ensure an accurate scan.

4. Connect the cable for the built-in transparency unit to the mound connector on the back of the scanner. You may need to raise the scanner cover and twist the cable to insert it.
5. Plug the square end of the USB cable into the scanner's USB port. Then plug the flat end into any available USB port on your computer or USB hub.
   - Note: Make sure the notched area at the top of the film holder is clear to ensure an accurate scan.

Place the scanner lid up.

6. Press the power button on the front of the scanner to turn it on. The scanner lamp comes on.
7. Place the film holder in the upper right corner, as shown.

Scanner Basics

Scanning With Photoshop

1. Raise the scanner lid and place your photo face down on the glass.
   - Place the photo in the top right corner
2. Start Adobe Photoshop Elements.
   - In Windows, click Start > Programs or All Programs > Adobe Photoshop Elements 2.0.
   - On a Macintosh, open the Adobe Photoshop Elements 2 folder (in your Applications folder) and double-click the Photoshop Elements 2.0 icon.
   - EPSON Scan starts, pre-scans, and recognizes the type of image you placed on the scanner, then scans your photo and opens it in Photoshop Elements.
   - Note: If fine-tune images, you can use EPSON Scan to make settings and see a preview before scanning. See your on-screen Scanner Reference Guide for details.
   - You can use Photoshop Elements to edit, enhance, save, and print your file.
4. EPSON Scan starts, pre-scans, and recognizes the type of image you placed on the scanner, then scans your photo and opens it in Photoshop Elements.
   - Note: If fine-tune images, you can use EPSON Scan to make settings and see a preview before scanning. See your on-screen Scanner Reference Guide for details.
5. Place the film holder in the upper right corner, as shown.

Using EPSON Smart Panel

You can use your scanner’s Start button to open EPSON Smart Panel, which gives you access to scanning. You can also open it by double-clicking the EPSON Smart Panel icon on your desktop.

1. Place your photo or document face down on the glass in the top right corner, then close the lid. (If you are scanning a film or slides, see the following steps for detailed instructions.)
2. Press the Start button on your scanner.
   - Note: In Windows XP, you may see a message the first time you press the Start button. Select Smart Panel for Scanner, click Always use this program for this action, then click OK.
3. Click the option of your choice to scan:
   - Copy: Make a quick copy, or several copies, of your document. Printing with EPSON color ink jet printers is recommended.
   - Photo Print: Make prints from your photos, negatives, and slides. Printing with EPSON color ink jet printers is recommended.
   - Scan to E-mail: If you have a MAPI-compliant e-mail program, scan an image and automatically attach it as a file to a new message.
   - Scan to OCR: Scan a text document and open it in your word processing application, then edit it and save it as a new file.
   - Scan to PDF: Automatically format and scan a photo and send it to your Palm or Pocket PC device.
   - Scan to P.I.M. File: Save images with an expanded color space and additional P.I.M. (PRINT Image Matching™) enhancements for printing with a P.I.M.-enabled printer and P.I.M. application.
   - Scan to Web: Scan your photos and upload them to the EPSON PhotoCenter™ photo-sharing website to share them with family and friends. To sign up for an account, go to http://photo.epson.com.
4. Follow the on-screen instructions to use the Smart Panel options. On many Smart Panel screens, you’ll need to click Finish to continue scanning and launch to start other programs. See your on-screen Smart Panel User’s Guide for detailed instructions.
5. Place the film holder in the upper right corner, as shown.

Placing Film on the Scanner

To scan film, you’ll need to remove the reflective document mat and place the film in a holder.

1. Place the film holder in the upper right corner, as shown.
2. Slide the film into the film holder.
3. Carefully pop the film cover off of the film holder: (Don’t remove the cover from the large format film holder, just lift it.)
4. Slide the film into the film holder, with the shiny base side facing down.
5. Replace the film cover and press it down until it clicks.

EPSON Smart Panel opens on your computer.

Note: Make sure the notched area at the top of the film holder is clear to ensure an accurate scan.

Problems?

First, check the light on the scanner.

- Flashing green
  - Warming up or scanning.
- Green
  - Ready to scan.
- Flashing red
  - Make sure the transportation lock is turned to the right (clockwise) as far as it will go.
  - Try restarting your computer and turning the scanner off and on again. If the red light is still flashing, contact your dealer or EPSON.
- Off
  - Make sure your scanner is connected to your computer and plugged into a power source.

If your problem is listed here, by these suggestions. For more information, see your software Help or your on-screen Scanner Reference Guide.

   You can use Photoshop Elements to edit, enhance, save, and print your file.

5. **Using EPSON Smart Panel**

   You can use your scanner's Start button to open EPSON Smart Panel, which gives you several options for scanning. You can also open it by double-clicking the EPSON Smart Panel icon on your desktop.

   **Note:** The Start button does not support Mac OS X. Smart Panel is available only as a Classic application.

   1. Place your photo or document face down on the glass in the top right corner, then close the lid. (If you are scanning a film or slides, see “Using EPSON On-Screen Scanner Reference Guide” for detailed instructions.

   2. Press the Start button on your scanner.

   ![External interface connector](image)

   **Note:** If you are scanning a film or slides, see “Using EPSON On-Screen Scanner Reference Guide” for detailed instructions.

   3. Click the option of your choice to scan:

      - Copy: Make a quick copy, or several copies, of your document.
      - Photo Print: Make prints from your photos, negatives, and slides.
      - Scan to OCR: Scan a text document and open it in your word processing application.
      - Scan to PDF: Automatically format and scan a photo and send it to your Palm or Pocket PC device.
      - Scan to P.I.M.: File: Save images with an expanded color space and additional P.I.M. (PRINT Image Matching)™ enhancements for printing with a P.I.M.-enabled printer and P.I.M. application.
      - Scan to Web: Scan your photos and upload them to the EPSON PhotoCenter website to share them with family and friends. To sign up for an account, go to http://photo.epson.com.

   4. Follow the on-screen instructions to use the Smart Panel options.

   On many Smart Panel screens, you'll need to click Finish to continue scanning and launch to start other programs. See your on-screen Smart Panel User's Guide for detailed instructions.

**Placing Film on the Scanner**

To scan film, you'll need to remove the reflective document mat and place the film in a holder.

**Note:** To scan slides or medium- or large-format film, follow these steps but use the correct holder. See your on-screen Scanner Reference Guide for detailed instructions.

1. Make sure the transparency unit cable is connected to the option interface connector (see step 3 in “Connect the Scanner”).

2. Lift the scanner lid all the way up and pull the reflective document mat up and off of the scanner lid, as shown.

3. Carefully pop the film cover off of the film holder. (Don’t remove the cover from the large format film holder, just lift it.)

4. Slide the film into the film holder, with the shiny base side facing down.

5. Replace the film cover and press it down until it clicks.

**Questions?**

Here's where to look for answers:

- **On-screen Help for Smart Panel and EPSON Scan** Click the Help button or question mark that appears on the screen when you’re using these programs.

**EPSON Technical Support**

EPSON provides technical assistance 24 hours a day through the electronic support services and automated telephone services described below:

- **Automated Telephone Services** To use Automated Telephone Services, you must have a touch-tone telephone and call (800) 922-8911. Your EPSON Support telephone number is still 7040A. Use it to quickly select your scanner in SoundAdvice.

- To Speak to a Technical Support Representative

  Dial “2” (612) 275-4800 or (952) 922-8911 (Canada), 6 A.M to 9 P.M, Pacific Time, Monday through Friday. Toll or long distance charges may apply.

To purchase optional accessories

Call the EPSON Store® at (800) 873-7760 or visit our web site at www.epsonstores.com (U.S. sales only). In Canada, please call (800) 463-7760 for dealer referral.

See your Notices booklet for additional software support information.

**Problems?**

First, check the light on the scanner.

- **Off** Make sure the scanner is connected to your computer and plugged into a power source.

- **Flashing red** Try restarting your computer and turning the scanner off and then on again. If the red light is still flashing, contact your dealer or EPSON.

- **Green** Make sure your scanner is connected to your computer and plugged into a power source.

- **Flashing green** Make sure your scanner is connected to your computer and plugged into a power source.

If your problem is listed here, try these suggestions. For more information, see your software Help or your on-screen Scanner Reference Guide.

**The Hardware Wizard appears on your screen**

Click Cancel and follow the steps on the other side of this sheet. Disconnect the scanner before installing the software.

**You see an error message when you try to scan, or the scanner doesn’t scan**

Uninstall and reinstall EPSON Scan.
Connect the Scanner

After your software is installed, it’s time to get connected.

1. Remove the sticker from the transportation lock. Use a coin to turn the lock clockwise one-quarter turn to unlock the scanner carriage.

2. Remove the sticker from the back of the scanner.

3. Connect the cable for the built-in transparency unit to the moud connector on the back of the scanner. You may need to raise the scanner cover and twist the cable to insert it.

4. Connect either the USB interface cable that comes with your scanner or an optional IEEE 1394 (FireWire) cable. Don’t connect both.

5. If you’re using USB...
   - Plug the square end of the USB cable into the scanner’s USB port. Then plug the flat end into any available USB port on your computer or USB hub.

   Note: Your scanner may not work correctly if you use a USB cable other than the one supplied by EPSON or if you connect your scanner to a multi-level USB hub system.

6. If you’re using IEEE 1394 (FireWire)...?
   - Plug one end of the IEEE 1394 cable (not included) into the scanner’s IEEE 1394 port. Then plug the other end into the IEEE 1394 (FireWire, iLink) port on your computer.

   Note: If you leave your scanner connected via IEEE 1394, it may cause other software programs to fail.

7. If you’re using a PDA...
   - Connect the cable other than the one supplied by EPSON or if you use the correct holder. See your on-screen instructions to use the Smart Panel options.

   Note: If the scanner lamp is not on, make sure the scanner is connected to your computer and plugged into a power source.

   Make sure your scanner is connected to your computer and plugged into a power source.

   Check the power light on the scanner. If it is not green, make sure your scanner is connected to your computer and plugged into a power source.

8. If you’re using a laptop...
   - Close the scanner lid.

   Note: Make sure the notched area at the top of the film holder is clear to ensure an accurate scan.

Scanning With Photoshop

1. Raise the scanner lid and place your photo face down on the glass.

2. Start Adobe Photoshop Elements.

   Note: In Windows XP, click Start ➤ All Programs ➤ Adobe Photoshop Elements 2.0.

3. On a Macintosh, open the Adobe Photoshop Elements 2 folder (in your Applications folder) and double-click the Photoshop Elements 2.0 icon.

   Note: If the Elements user interface appears on your screen, you may need to restart your computer or reinstall the software.

4. Select File ➤ Import ➤ EPSON Scanner Perfection 3200.

   Note: If your scanner is not listed, press the Space bar to find it in the list of scanners.

   EPSON Scanner Perfection 3200 opens on your computer.

5. Click the option of your choice to scan:

   - Copy: Make a quick copy, or several copies, of your document. Printing with EPSON color ink jet printers is recommended.
   - Photo Print: Make prints from your photos, negatives, and slides. Printing with EPSON color ink jet printers is recommended.
   - Scan to Application: Scan an image and open it in any supported application.
   - Scan to E-mail: If you have a MAPI–compliant e-mail program, scan an image and automatically attach it as a file to a new message.
   - Scan to OCR: Scan a text document and open it in your word processing application, then edit it and save it as a new file.
   - Scan to PDF: Automatically format and scan a photo and send it to your Palm or Pocket PC device.

   Note: ADOC is not supported by this option.

   Scan to File: Save your scan directly to a file on your hard drive.

   Scan to OCR: Scan a text document and open it in your word processing application, then edit it and save it as a new file.

   Scan to PDF: Automatically format and scan a photo and send it to your Palm or Pocket PC device.

   Scan to P.I.M. File: Save images with an expanded color space and additional P.I.M.™ enhancements for printing with a P.I.M.–enabled printer and P.I.M. application.

   Scan to Web: Scan your photos and upload them to the EPSON PhotoCenter® photo-sharing website to share them with family and friends. To sign up for an account, go to http://photo.epson.com.

6. Follow the on-screen instructions to use the Smart Panel options.

   On many Smart Panel screens, you’ll need to click Finish to continue scanning and launch or start other programs. See your on-screen Smart Panel User’s Guide for detailed instructions.

   You can use Photoshop Elements to edit, enhance, save, and print your file.

Placing Film on the Scanner

To scan film, you’ll need to remove the reflective document mat and place the film in a holder.

1. To scan slides or medium- or large-format film, follow these steps but use the correct holder. See your on-screen Scanner Reference Guide for detailed instructions.

   Note: To scan slides or medium- or large-format film, follow these steps but use the correct holder. See your on-screen Scanner Reference Guide for detailed instructions.

   1. Place your photo or document face down on the glass in the top right corner, then close the lid. (If you are scanning a slide or film, see “Using EPSON Smart Panel.”)

   2. Press the Start button on your scanner.

      Note: In Windows XP, you may see a message the first time you press the Start button. Select Smart Panel for Scanner, click Always use this program for this action, then click OK.

      Note: If the scanner lamp is not on, make sure the scanner is connected to your computer and plugged into a power source.
