1 Unpack

Remove everything from the box.

Remove all the tape and packing material from the printer.

2 Turn On the Printer

Plug the printer's power cord into an electrical outlet.

Press the Power button to turn on the printer.

NOTE: Do not connect the printer to your computer yet. Wait until you are instructed to connect the printer cable in section 5, “Install Software.”

The Power light flashes as your printer charges ink for about 2 1/2 minutes.

CAUTION: Don’t turn off the printer or interrupt charging while the light is flashing or you'll waste ink.

3 Install Ink Cartridges

There are 8 cartridge slots in the printer, but 9 ink cartridges are included. One slot can use either the Photo Black cartridge or the Matte Black cartridge. Install the Photo Black cartridge for professional quality glossy printing and for printing on a wide range of media. Install the Matte Black cartridge for professional quality matte printing. For details, see your User’s Guide.

Open the printer cover.

Shake the ink cartridge packages 4 or 5 times before opening them. (Don’t shake them after they’re unpacked.)

Unwrap the ink cartridges.

Don’t touch the green circuit board or remove any labels.

Open the cartridge cover and remove the insert.

Lower each cartridge into its holder with the green circuit board facing the front. The color of the cartridge label should match the marker above the cartridge holder.

Then gently push each ink cartridge down until it clicks into place.

4 Load Paper

Flip open the paper support and pull up the extensions.

Press the bottom of the output tray. The tray opens and moves up. Pull out the extension.

Fan a few sheets of paper and load them against the right side of the sheet feeder. Slide the left edge guide against the paper.

NOTE: For instructions on loading and printing on roll paper, matte paper, and other special media, see your User’s Guide.

5 FireWire (IEEE 1394) cable

Matte sheet support

Roll paper holders

Single sheet guide

Printer Software CD-ROM

User’s Guide

NOTE: For instructions on using the special media accessories, see your User’s Guide.

6 Close the cartridge cover. Push it down at the top so it clicks into place.

7 Press the Ink button and close the printer cover.

The Power light flashes as your printer charges ink for about 2 1/2 minutes.

CAUTION: Don’t turn off the printer or interrupt charging while the light is flashing or you'll waste ink.

8 Install Ink Cartridges

There are 8 cartridge slots in the printer, but 9 ink cartridges are included. One slot can use either the Photo Black cartridge or the Matte Black cartridge. Install the Photo Black cartridge for professional quality glossy printing and for printing on a wide range of media. Install the Matte Black cartridge for professional quality matte printing. For details, see your User’s Guide.

Open the printer cover.

Shake the ink cartridge packages 4 or 5 times before opening them. (Don’t shake them after they’re unpacked.)

Unwrap the ink cartridges.

Don’t touch the green circuit board or remove any labels.

Open the cartridge cover and remove the insert.

Lower each cartridge into its holder with the green circuit board facing the front. The color of the cartridge label should match the marker above the cartridge holder.

Then gently push each ink cartridge down until it clicks into place.

6 Close the cartridge cover. Push it down at the top so it clicks into place.

7 Press the Ink button and close the printer cover.

The Power light flashes as your printer charges ink for about 2 1/2 minutes.

CAUTION: Don’t turn off the printer or interrupt charging while the light is flashing or you'll waste ink.

9 Print a Test Page

Press the Print button. The printer prints a test page to verify the installation. If the test page doesn’t print correctly, see “Troubleshooting.”

10 Clean the Print Head

If the print quality is not acceptable, clean the print head. For details, see your User’s Guide.

Print a test page, then clean the print head. Repeat the process until the print quality improves.

NOTE: For instructions on cleaning the print head, see your User’s Guide.

Load Paper

4
Install Software

Windows

1. Turn on your computer. Wait for the system to start up, then insert the Epson CD-ROM in your drive.

With Windows Vista, if you see the AutoPlay window, click Run Epsetup.exe. When you see the User Account Control screen, click Continue.

NOTE: If you see a screen like this, click Cancel and disconnect the printer from your computer. Then follow the steps below.

2. Read the license agreement that appears and click AGREE.

3. You see a message like this.

Click OK to begin installing your printer driver.

4. When you see this screen, follow the steps below to connect either a USB cable or a FireWire cable.

NOTE: Windows Vista supports only a USB connection.

USB

Connect the square end of your USB cable to the back of your printer and the flat end of the USB cable to your computer. (You can connect to any open port.)

NOTE: For Windows XP, if you don’t have USB 2.0, you see a message. Click the Close button to close the message.

FireWire

Connect one end of the FireWire cable to the back of your printer and the other end to your computer.

NOTE: If your computer uses iLink or another 4-pin FireWire connection, you will need to connect a 6-pin to 4-pin FireWire (IEEE 1394) cable.

5. When you see this screen, click Next.

6. Click Photo Software.

Click to load the Epson CD-ROM to install the software. Then click the Next button to install the software.

7. Click Color Management Solutions.

Click to learn more about it. If you want to install any options, follow the on-screen instructions.

8. When you've finished installing software, close any open windows on the screen and click Back at the Color Management Solutions menu.

9. Click Epson PhotoCenter Link.

Add the Epson PhotoCenter link to your desktop.

10. Follow the on-screen instructions to register your printer.

11. You're ready to print! See section 6, “Print.”

Macintosh

The software works with Mac OS X 10.2.8 and 10.3.9 through 10.4.x.

1. Connect your printer to your computer with either a USB cable or a FireWire cable.

USB

Connect the square end of your USB cable to the back of your printer and the flat end of the USB cable to your computer. (You can connect to any open port.)

2. Turn on your Macintosh. Wait for it to start up, then insert the Epson CD-ROM into your drive.

3. Double-click the CD-ROM icon, if necessary, then double-click EPSON.

4. Read the license agreement that appears and click AGREE.

5. Click Printer Driver and follow the on-screen instructions.

6. Click Photo Software.

Click to load the Epson CD-ROM to install the software. Then click the install button to install the software.

7. When you've finished, close any open windows on the screen and click Back to the Install Menu.

8. Click Color Management Solutions.

Click to learn more about it. If you want to install any options, follow the on-screen instructions.

9. When you've finished installing software, close any open windows on the screen and click Back at the Color Management Solutions menu.

10. Click Epson PhotoCenter Link.

Add the Epson PhotoCenter link to your desktop.

11. When you're done installing software, click Exit. The registration screen appears.

12. Follow the on-screen instructions to register your printer.

Go to the next section to finish setting up your printer.

Print

Now you're ready to print. For instructions, use these resources:

• Your User’s Guide

Learn about loading paper, printing, maintaining your printer, solving problems, and contacting Epson.

• Your on-screen Reference Guide

Double-click the SPR2400 Reference Guide icon on your desktop to view more information about your printer.
5 Install Software

Windows

The software works with Windows 2000, XP, XP Professional x64 Edition, and Windows Vista™. Make sure your printer is NOT connected to your computer, then follow the steps below.

1 Turn on your computer. Wait for the system to start up, then insert the Epson CD-ROM in your drive.
   With Windows Vista, if you see the AutoPlay window, click Run Epsetup.exe. When you see the User Account Control screen, click Continue.
   NOTE: If you see a screen like this, click USB and disconnect the printer from your computer. Then follow the steps below.

2 Read the license agreement that appears and click AGREE.

3 You see a message like this. Click OK to begin installing your printer driver.

4 When you see this screen, follow the steps below to connect either a USB cable or a FireWire cable.
   NOTE: Windows Vista supports only a USB connection.

USB

Connect the square end of your USB cable to the back of your printer and the flat end of the USB cable to your computer. (You can connect to any open port.)

NOTE: For Windows XP, if you don’t have USB 2.0, you see a message. Click the Close button to close the message.

FireWire

Connect one end of the FireWire cable to the back of your printer and the other end to your computer.

NOTE: If your computer uses iLink or another 4-pin FireWire connection, you will need to connect a 6-pin to 4-pin FireWire (IEEE 1394) cable.

5 When you see this screen, click Next.

6 Click Photo Software.
   Click nik Color Efex Pro 2.0 Sample Filters to learn more about it. When you’re finished, close any open windows on the screen and click Back twice to return to the Optional Software menu.

7 Click Color Management Solutions.
   Click each title to learn more about it. If you want to install any options, follow the on-screen instructions.

8 When you’re finished installing software, close any open windows on the screen and click Back at the Color Management Solutions menu.

9 Click Epson PhotoCenter Link.
   Add Icon to place a link to the Epson PhotoCenter website on your desktop, then click OK.

10 When you’re done installing software, click Exit. The registration screen appears.

11 Follow the on-screen instructions to register your printer.
   NOTE: Be sure to restart your computer to enable all of your printer software features.

You’re ready to print! See section 6, “Print.”

Macintosh

The software works with Mac OS X 10.2.8 and 10.3.9 through 10.4.x.

1 Connect your printer to your computer with either a USB cable or a FireWire cable.
   USB
   Connect the square end of your USB cable to the back of your printer and the flat end of the USB cable to your computer. (You can connect to any open port)

   FireWire
   Connect one end of the FireWire cable to the back of your printer and the other end to your computer.

2 Turn on your Macintosh. Wait for it to start up, then insert the Epson CD-ROM into your drive.

3 Double-click the CD-ROM icon, if necessary, then double-click EPSON.

4 Read the license agreement that appears and click AGREE.

5 Click Printer Driver and follow the on-screen instructions.

6 Click Photo Software.
   Click nik Color Efex Pro 2.0 Sample Filters to learn more about it.
   When you’re finished, close any open windows on the screen and click Back twice to return to the Install Menu.

7 Click Color Management Solutions.
   Click each title to learn more about it. If you want to install any options, follow the on-screen instructions.

8 When you’re finished installing software, close any open windows on the screen and click Back at the Color Management Solutions menu.

9 Click Epson Reference Guide to install the guide.

10 Click Epson PhotoCenter Link.
   Click Add Icon to place a link to the Epson PhotoCenter website on your desktop, then click OK.

11 When you’re done installing software, click Exit. The registration screen appears.

12 Follow the on-screen instructions to register your printer.
   Go to the next section to finish setting up your printer.

Finishing Printer Setup

1 Open the Applications folder, then open the Utilities folder and double-click Printer Setup Utility (OS X 10.4.x or 10.3) or Print Center (OS X 10.2).

2 Click the Add button.

3 In Mac OS X 10.4, select Stylus Photo R2400. If it doesn’t appear, click More Printers, select EPSON USB or EPSON FireWire, choose Stylus Photo R2400, and add it.
   In Mac OS X 10.2 and 10.3, select EPSON USB at the top and Stylus Photo R2400 below.

4 Click Add.

5 Quit the Printer Setup Utility or Print Center.
   You’re ready to print! See section 6, “Print.”

6 Print

Now you’re ready to print. For instructions, use these resources:
