

CO-W01/CO-FH02

Release notes

Version 1.09

Feature improvement

Optimized the drive control of the LCD panel

Version 1.08

Security updates

(RED 1) The minimum number of characters for "Remote Password" and "Web Control Password" has been changed to 8 characters, and the maximum number of characters to be entered is 32.

(RED 2) If the "Remote Password", "Web Control Password", or "Passphrase" for Simple AP is set to 7 characters or less, you will get a message to enter a password using at least 8 characters.

(RED 3) Measures against Brute-force attacks.

If the password ("Remote Password", "Web Control Password", "Monitor Password") is incorrect when connecting to the projector using a web browser or ESC/VP.net, access from the same IP address will be restricted for 2 seconds using.

(RED 4) Firmware downgrading is not supported.

To enhance security, downgrading from V108 or later is no longer possible. If you attempt to do so, the projector's lights will flash rapidly, and the downgrade will always fail. Security update- European Radio Equipment Directive (RED)

Version 1.07

Feature improvement

Support for Epson Projector Management Connected Ver.2.20.

Usability improvement- Support for USB Display Ver.1.83
(Windows/Mac).

Version 1.06

Feature improvement

- 1) Improved image quality in specific gray level image.
- 2) If no password has been set, you will be prompted to enter the Web Control Password when the network settings are complete.
- 3) "Basic Control" menu was added to the projector's menu under "Others". (Network --> Network Configuration --> Others)
- 4) If you set "Basic Control" to "On", you will be prompted to enter the Remote Password.
- 5) "Help text" and "Number of characters that can be entered" are added to the password entry screen of the "Web Control Password" and "Remote Password" projector menu.
- 6) The following two menus are added under the "Info" menu in the projector's menu.

- Export Batch Settings: A batch setup file is exported to a USB storage device connected to the projector.

- Import Batch Settings: A batch setup file stored in a USB storage device connected to the projector is imported.

Note- The following items will not copy into the Batch Settings.

- PJLink
- Web API
- SNMP

- Crestron Connected

- Basic Control
