

iProjection

Release notes

Windows Version V4.10

- 1) Added support for Arm-equipped Windows PCs.
- 2) Added support for displaying the location permission dialog.

Bug fix

- (1) Fixed an issue where reconnection was not possible after disconnecting from an extended display.
- (2) Fixed an issue where operation became unstable when the projector's LAN cable was unplugged immediately after connection.

Mac Version V4.04

Added support for macOS Tahoe 26

Bug Fix

Fixed a bug that caused the installation to become inoperable during installation.
