<sup>1</sup> Black text printing about two times faster compared to ink jet printers priced at \$129 or less, available as of April 2008. Based on independent test in default mode printing typical office documents.

<sup>2</sup> Draft pages per minute (ppm) speeds measured after first page, based on black and color text patterns in Draft Mode on plain paper. Laser quality pages per minute (ppm) speeds measured after first page, based on black text patterns in default mode on plain paper. Additional print time will vary based on system configuration, software application and page complexity. See [www.epson.com/printspeed](http://www.epson.com/printspeed) for more information about print speeds.

<sup>3</sup> Some applications and/or functions, like double-sided printing, are not supported by Mac.

<sup>4</sup> Compared to competitive monochrome laser printers priced at \$199 or less available as of March 2008. Based on Epson testing of power estimated to be used during an eight-hour day.

<sup>†</sup> Ink fade resistance ratings are based on accelerated testing of prints on specialty media, displayed indoors, under glass. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or properly store them. Visit [www.wilhelm-research.com](http://www.wilhelm-research.com) for the latest information.

<sup>††</sup>We recommend that you use genuine Epson ink cartridges. The use of other products may affect your print quality and could result in printer damage. Cartridge yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature. For print quality, a small amount of ink remains in the cartridge after the "Replace cartridge" indicator comes on. The printer ships with full cartridges and part of the ink from the first cartridges is used for priming the printer. See [www.epson.com/cartridgeinfo](http://www.epson.com/cartridgeinfo) for more information about cartridges.
