Two-Sided Printing, Scanning, Copying, and Faxing

You can print on both sides of the page automatically, using the product's built-in duplexer. By loading your pages in the automatic document feeder (ADF), you can also scan, copy, and fax double-sided documents.

- To print on both sides of the page from your computer, select **2-Sided Printing** (Windows) or one of the **Two-sided Printing Settings** (Mac OS X).
• To scan a double-sided document in the ADF, press the Scan button, select your scanning method, then press the Menu button. Select Scan Settings > 2-Sided Scanning. If you are using the Epson Scan software, select ADF - Double-sided as the Document Source (Office or Professional Modes only).

• To copy a double-sided document in the ADF, press the Copy button, then press the Menu button. Select Paper and Copy Settings, then select one of the 2-Sided Copying settings.

• To fax a double-sided document in the ADF, press the Fax button, then press the Menu button. Select Send Settings > 2-Sided Faxing.

Selecting Wireless Network Settings From the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software from the product CD. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the Setup button.
2. Select Wi-Fi/Network Settings and press the OK button.
3. Select Wi-Fi Setup and press the OK button.
You see this screen:

![Image of Wi-Fi Setup screen](image)

4. Select **Wi-Fi Setup Wizard** and press the **OK** button.

   **Note:** If you need to disable the wireless network to set up your product on an Ethernet network, select **Disable Wi-Fi** instead. Then follow the instructions on the *Start Here* sheet to set up your product on a wired network and install the necessary software from the product CD. The installer program guides you through network setup.

5. Select the name of your wireless network (SSID) or enter the name manually.

   **Note:** To enter the wireless network name manually, select **Other SSIDs** and press the **OK** button. Use the displayed keypad to enter your network name, as described in the next step.
6. Enter your wireless password (or network name and then password) using the displayed keypad.

![Image of Enter Password keypad]

**Note:** If your password has uppercase (ABC) or lowercase (abc) letters, make sure you enter them correctly.

- Press the arrow buttons to highlight a character or a function button displayed on the keypad. Then press the **OK** button to select it.
- To change the case of letters or select symbols, select **AB12** (uppercase), **ab12** (lowercase), or **Symbol** and press the **OK** button. Then highlight an option and press the **OK** button to select it.
- To enter a space, select **Space** and press the **OK** button.
- To delete characters, select the back arrow and press the **OK** button.
- When you finish entering characters, select **Done** and press the **OK** button.

7. Confirm the displayed network settings and press the **OK** button to save them.

**Note:** If you need to change a setting, press the **Back** button.

8. If you want to print a network setup report, select **Yes** and press the **OK** button. (Otherwise, select **No**.)

9. Press the **Copy** button to exit.

   The WiFi light should now be on, but not flashing.
Note: If the WiFi light is off, you may have selected the wrong network name (SSID) or entered the password incorrectly. Repeat these steps to try again.

Wireless Printing from a Mobile Device

You can print photos, documents, web pages, and more from a compatible wireless mobile device, such as a smartphone, iPhone, tablet, iPad, or iPod.

1. Set up your product for wireless printing as described on the Start Here sheet.
2. Visit www.epson.com/connect to learn more about mobile device printing and check the compatibility of your mobile device.
3. Download and install one of the available printing applications for your mobile device, such as Epson iPrint and PrintJinni for Epson.
4. Connect your mobile device to the same wireless network that your product is using.
5. Print from your mobile device to your product.

Parent topic: Product Basics
Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Cassette
Loading Paper in the Rear MP (Multipurpose) Tray
Loading Envelopes
Paper Loading Capacity
Available Epson Papers
Paper or Media Type Settings
Setting the Paper Size for Each Source
Setting Additional Paper Options
Installing the Optional Second Paper Cassette

Loading Paper in the Cassette

You can load Letter (8.5 × 11 inches [216 × 279 mm]), A4 (8.3 × 11.7 inches [210 × 297 mm]), and Legal (8.5 × 14 inches [216 × 357 mm]) plain paper in the paper cassette.

1. Close the output tray, if necessary.
2. Pull out the paper cassette.

3. Slide the edge guides outward.

**Note:** If you are using legal-size paper, squeeze the tab to extend the paper cassette.
4. Load a stack of paper, printable side down, in the cassette as shown.
5. Slide the edge guides against the paper, but not too tight.

**Note:** Make sure the paper fits beneath the top edges of the guide, and is not sticking out from the end of the cassette.
Caution: To prevent paper feeding problems, make sure you do not load too much paper in the cassette.

6. Gently replace the paper cassette.

7. Extend the output tray and open the paper stopper.
**Note:** If you are using legal-size or longer paper, do not open the paper stopper. Do not remove or insert the paper cassette during printing.

**Parent topic:** Loading Paper

---

**Loading Paper in the Rear MP (Multipurpose) Tray**

You can print documents on a variety of paper types and sizes.

1. Extend the output tray and open the paper stopper.

**Note:** If you are using legal-size or longer paper, do not open the paper stopper.
2. Pull up the rear MP tray.

3. Flip the feeder guard forward, then slide the edge guides outward.
4. Insert paper, glossy or printable side up and short edge first, in the center of the tray. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

Caution: To prevent paper feeding problems, make sure you do not load too much paper in the tray.

5. Slide the edge guides against the paper, but not too tightly.

Always follow these paper loading guidelines:
- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guides.
- Check the paper package for any additional loading instructions.
Note: You can load binder paper with holes in the rear MP tray. The paper must be one of the following sizes: Letter (8.5 × 11 inches [216 × 279 mm]), A4 (8.3 × 11.7 inches [210 × 297 mm]), or Legal (8.5 × 14 inches [216 × 357 mm]). The holes must be within 0.74 inch (19 mm) of the left edge of the page.

Loading Paper in the Cassette
Loading Envelopes

Loading Envelopes
You can print on plain paper envelopes in this size: No. 10 (4.1 × 9.5 inches [105 × 241 mm]).
1. Extend the output tray and open the paper stopper.
2. Pull up the rear MP tray.

3. Flip the feeder guard forward, then slide the edge guides outward.
4. Insert envelopes, short edge first and with the flap facing down, in the center of the tray.

5. Slide the edge guides against the envelopes, but not too tightly.

Always follow these paper loading guidelines:
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- If print quality declines when printing multiple envelopes, try loading one envelope at a time.
- Do not load envelopes that are curled, folded, or too thin.

Setting the Paper Size for Each Source - Mac OS X

Parent topic: Loading Paper

Setting the Paper Size for Each Source - Control Panel
You can change the default paper size for each source using the control panel on the product.

1. Press the \texttt{Setup} button.
2. Select \texttt{Printer Setup} and press the \texttt{OK} button.
3. Select \texttt{Paper Size Loaded} and press the \texttt{OK} button.
   
   You see this screen:

   ![Paper Size Loaded]

4. Select the paper source you want to change and press the \texttt{OK} button.
5. Select the paper size you loaded and press the \texttt{OK} button.
6. Press the \texttt{Back} button.
7. Select \texttt{Paper Size Notice} and press the \texttt{OK} button.
8. Select Yes if you want the printer to prevent you from printing with the wrong paper size settings.

    Note: If you choose No and you try to print with the wrong settings, the printer will print even if the image size exceeds the printable area, and your printout may be smudged.

9. Press the Copy button to exit.

    Parent topic: Setting the Paper Size for Each Source

Setting the Paper Size for Each Source - Windows

You can change the default paper size for each source in Windows.

1. Do one of the following:
   - Windows 7: Click and select Devices and Printers. Right-click your product name, and select Printer properties.
   - Windows Vista: Click and select Control Panel. Click Printer under Hardware and Sound, right-click your product name, and select Properties.
   - Windows XP: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware if necessary, and select Printers and Faxes.) Right-click your product name and select Properties.

2. Click the Optional Settings tab.

3. Click Printer Settings.
   You see this screen:
4. Select the paper size you loaded in each paper source as the **Paper Size Loaded**. If your paper doesn't match any of the sizes listed for the rear MP tray, select **Others**.

5. If you want the printer software to warn you if you try to print with the wrong paper size, select the **Paper Size Notice** checkbox.

   **Note:** If you turn on **Paper Size Notice**, the printer will prevent you from printing with the wrong paper size settings. If you turn this option off and you try to print with the wrong settings, the printer will print even if the image size exceeds the printable area, and your printout may be smudged.

6. Click **Apply**.

7. When you see the confirmation message, click **Yes**.

8. Close the Printer Settings window.

**Parent topic:** [Setting the Paper Size for Each Source](#)
Setting the Paper Size for Each Source - Mac OS X

You can change the default paper size for each source in Mac OS X.

1. Do one of the following:
   - **Mac OS X 10.6/10.7**: In the Apple menu or the Dock, select System Preferences. Select Print & Fax or Print & Scan, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
   - **Mac OS X 10.4/10.5**: In the Apple menu or the Dock, select System Preferences. Select Print & Fax or Print & Scan, select your product, and select Open Print Queue or Print Queue. Select Utility.

2. Click the Printer Settings button.

You see this screen:

![Epson Printer Utility 4](image)

3. Select the paper size you loaded in each paper source as the Paper Size Loaded. If your paper doesn't match any of the sizes listed for the rear MP tray, select Others.
4. If you want the printer software to warn you if you try to print with the wrong paper size, select the Paper Size Notice checkbox.

**Note:** If you turn on Paper Size Notice, the printer will prevent you from printing with the wrong paper size settings. If you turn this option off and you try to print with the wrong settings, the printer will print even if the image size exceeds the printable area, and your printout may be smudged.

5. Click Apply.
6. When you see the confirmation message, click Yes.
7. Close the Printer Settings window.

### Setting Additional Paper Options

When printing or copying on special paper, you can adjust these options to ensure your documents print correctly.

1. Press the **Setup** button.
2. Select Printer Setup and press the **OK** button.

   You see this screen:
3. Select one of the following:
   - Select **Thick Paper** and press the **OK** button to print on heavyweight paper.
   - Select **Dry Time**, then choose **Long** or **Longer** and press the **OK** button to increase ink drying time when you print double-sided on special paper.

4. Press the **Copy** button to exit.

**Parent topic:** Loading Paper

### Installing the Optional Second Paper Cassette

You can install the optional paper cassette to provide more paper capacity.

1. Turn off the product and unplug the power cord and any connected cables.

   **Caution:** To avoid electric shock, make sure you unplug the power cord.

2. Remove the paper cassette from its carton and place it where you want to set up the product.
3. Carefully lift the product as shown, then gently lower it onto the paper cassette. Make sure the connectors and pins align correctly.

4. Reconnect the power cord and connector cables, and plug in the product.

5. Turn on the product.

*Parent topic: Loading Paper*
Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder

**Placing Originals on the Scanner Glass**

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top facing as shown. Slide the original to the edges of the indicated corner.

![Image of placing original on scanner glass]

**Note:** You can place multiple originals on the scanner glass. Just make sure they are at least 0.8 inch (20 mm) away from each other.

3. Close the document cover gently to keep your original in place.

**Parent topic:** Placing Originals on the Product
Placing Originals in the Automatic Document Feeder

You can place multi-page original documents in the Automatic Document Feeder (ADF). Make sure the originals meet the Automatic Document Feeder specifications before loading them.

**Caution:** Make sure your originals are not creased or folded, or contain holes, staples, tape, or other materials that could obstruct the feeder.

1. Slide the ADF edge guide outward.

2. Fan your stack of originals and tap them gently on a flat surface to even the edges.
3. Insert the originals into the ADF faceup and top-edge first.

4. Slide the ADF edge guide against the originals, but not too tightly.

Note: If you're using the 2-up Copy layout, make sure the originals are loaded as shown:

### Copying Documents or Photos

You can copy documents or photos onto various sizes and types of paper, including Epson special papers.

1. Place your original document or photo on the scanner glass, or place multi-page documents in the ADF.
2. Load the paper you want to print on.
3. Press the **Copy** button.
   You see this screen:
4. To print more than one copy, press the up or down arrow buttons to select the number (up to 99).

5. If you need to adjust the darkness of your copy, press the left or right arrow buttons to change the Density setting.

6. To change any of the print settings displayed on the LCD screen, press the Menu button, select Paper and Copy Settings, press the OK button, and select the necessary settings.

7. When you are ready to copy, press one of the Start buttons.

   Note: To cancel printing, press the Stop/Reset button.

Printing with Windows

You can print with your product using any Windows printing program, as described in these sections.

Selecting Basic Print Settings - Windows
Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows
Printing Your Document or Photo - Windows
Selecting Default Print Settings - Windows
Changing Automatic Update Options

Parent topic: Printing From a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.
3. If necessary, select your product name as the printer you want to use.

**Note:** You may also need to select Properties or Preferences to view your print settings.

You see the Main tab of your printer settings window:

![Printer Settings Window](image)

4. Select the **Paper Source** setting that indicates where you loaded the paper you want to print on.
5. Select the size of the paper you loaded as the **Document Size** setting.

**Note:** You can also select the **User Defined** setting to create a custom paper size.

6. Select the orientation of your document.

**Note:** If you are printing an envelope, select **Landscape**.
7. Select the type of paper you loaded as the **Paper Type** setting.

   **Note:** Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.

9. Select a Color option:

   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

10. To print on both sides of the paper, select the **2-Sided Printing** checkbox and select the options you want.

11. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

12. To print multiple copies and arrange their print order, select the **Copies** options.

13. To preview your job before printing, select **Print Preview**.

14. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

15. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **Quiet Mode**.

Print Quality Options - Windows
You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type you have chosen.

Economy
For fast printing with reduced quality.

Normal
For everyday text and image printing.

Fine
For text and graphics with good quality and print speed.

Quality
For photos and graphics with good quality and print speed.

High Quality
For photos and graphics with high print quality.

Best Quality
For the best print quality, but the slowest print speed.

Parent topic: Selecting Basic Print Settings - Windows

Multi-Page Printing Options - Windows
You can select any of the available options in the Multi-Page menu to set up your multi-page print job.

2-Up and 4-Up
Prints 2 or 4 pages on one sheet of paper. Click the Page Order button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.
Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting the **2-Sided Printing** checkbox on the Main tab.

![Settings window]

**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select the **2-Sided Printing** checkbox.
2. If the Auto checkbox is not automatically selected, do one of the following:
   - Select the **Auto** checkbox to automatically print your double-sided print job.
   - Deselect the **Auto** checkbox to print your double-sided print job manually by printing one side and flipping the paper over to print the other side (recommended for paper types that do not support automatic duplexing).
3. Click the **Settings** button.

You see this window:
4. Select the double-sided printing options you want to use.
5. Click **OK** to return to the Main tab.
6. Click the **Print Density** button.
   
   You see this window:
7. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.

8. If you selected the User-Defined document type, select the Adjustments options you want to use.

9. Click OK to return to the Main tab.

10. Print a test copy of your double-sided document to test the selected settings.

11. Follow any instructions displayed on the screen during printing.

Double-sided Printing Options - Windows
Print Density Adjustments - Windows

Parent topic: Printing with Windows

Double-sided Printing Options - Windows

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.

Binding Edge Options
Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options
Select options that define a wider margin to allow for binding.

Create Folded Booklet Options
Select the Booklet checkbox and a binding option to print double-sided pages as a booklet.

Parent topic: Selecting Double-sided Printing Settings - Windows
Print Density Adjustments - Windows

When you select the User-Defined setting, you can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

**Print Density**
Sets the level of ink coverage for double-sided printing.

**Increased Ink Drying Time**
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

Parent topic: Selecting Double-sided Printing Settings - Windows

Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.
1. To change the size of your printed document or photo, select the Reduce/Enlarge Document checkbox and select one of these sizing options:
   - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of the your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting.
   - Select the Zoom to option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select Automatic to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
   - Select Custom and click the Advanced button to manually adjust the color correction settings or turn off color management in your printer software.

3. To add a watermark to your printout, select Watermark settings.

4. Select any of the Additional Settings options to customize your print.

   Custom Color Correction Options - Windows
   Additional Settings Options - Windows

Parent topic: Printing with Windows

Related tasks

Printing Your Document or Photo - Windows

**Custom Color Correction Options - Windows**

You can select any of the available options in the Color Correction window to customize the image colors for your print job.
Color Controls

Lets you select a Color Mode setting, individual settings for Brightness, Contrast, Saturation, and Density, and individual color tones. If you select the Adobe RGB color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo

Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

ICM

Lets you manage color using installed color printing profiles.

No Color Adjustment

Turns off color management in your printer software so you can manage color using only your application software.
Additional Settings Options - Windows

You can select any of the Additional Settings options to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

**Rotate 180º**
Prints the image rotated 180º from its original orientation.

**High Speed**
Speeds up printing, but may reduce print quality.

**Mirror Image**
Flips the printed image left to right.

**Edge Smoothing**
Prints sharper edges on low-resolution images, such as bars in a graph.

**Fix Red-Eye**
Reduces or removes red-eye in photos.

Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the Add/Remove Presets button.

1. Click the Main or More Options tab.
   You see the available Printing Presets options on the left:
2. Place your cursor over a Printing Presets option to view its list of settings.
3. Use any of the available options on the screen to control your printing presets.
4. To choose an option for printing, select it.
5. Click OK.

Parent topic: Printing with Windows

Printing Your Document or Photo - Windows

Once you have selected your print settings, you are ready to save your settings and print.

1. Click OK to save your settings.

You see your application's Print window, such as this one:
2. Click **OK** or **Print** to start printing.

**Parent topic:** Printing with Windows

### Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.

You see the printer settings window:
3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Changing the Language of the Printer Software Screens**

*Parent topic: Printing with Windows*

**Changing the Language of the Printer Software Screens**

You can change the language used on the Windows printer software screens.

1. Right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.

You see the printer settings window.

3. Click the **Maintenance** tab.
You see the maintenance options.

4. Select the language you want to use as the **Language** setting.

5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

*Parent topic: Selecting Default Print Settings - Windows*

**Changing Automatic Update Options**

Your printer software for Windows automatically checks for updates to the product driver and firmware. You can change how often the software checks for updates or disable this feature.

1. Right-click the product icon in the Windows taskbar.

2. Select **Auto Update Settings**.

You see this window:
3. Do one of the following for each type of update:
   • To change how often the software checks for updates, select a setting in the **Check every** menu.
   • To disable the automatic update feature, select the **Never** option.
4. Click **Apply**.
5. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, it's a good idea to periodically check for updates.

**Parent topic:** Printing with Windows

![Paper Size and Orientation](image)

Note: If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting Page Setup from the File menu.

1. Select the size of the paper you loaded as the Paper Size setting. You can also select a custom setting to create a custom paper size.
2. Select the orientation of your document or photo as shown in the print window.

   Note: If you are printing an envelope, select the icon.

Note: You can reduce or enlarge the size of the printed image by selecting Paper Handling from the pop-up menu and selecting a scaling option.

Parent topic: Printing with Mac OS X 10.5, 10.6, or 10.7

Selecting Print Layout Options - Mac OS X 10.5/10.6/10.7

You can select a variety of layout options for your document or photo by selecting Layout from the pop-up menu on the print window.
To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.

To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.

To rotate the printed image, select the **Reverse page orientation** setting.

**Parent topic:** Printing with Mac OS X 10.5, 10.6, or 10.7

### Sizing Printed Images - Mac OS X 10.5/10.6/10.7

You can adjust the size of the image as you print it by selecting **Paper Handling** from the pop-up menu on the Print window.
• To print only selected pages in a multi-page document, select an option from the Pages to Print pop-up menu.
• To adjust the order in which pages are printed, select an option from the Page Order pop-up menu.
• To scale the image to fit on a specific paper size, select the Scale to fit paper size checkbox and select a paper size from the Destination Paper Size pop-up menu.

Parent topic: Printing with Mac OS X 10.5, 10.6, or 10.7

Selecting Double-sided Printing Settings - Mac OS X 10.5/10.6/10.7

You can print on both sides of the paper by selecting Two-sided Printing Settings or Output Settings from the pop-up menu on the print window.

![Two-sided Printing Settings](image)

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the version of Mac OS X you are using.

1. Select one of the Two-sided Printing options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

![Two-sided Printing Settings](image)

3. If necessary, customize the Adjustments settings as instructed on the screen.
4. Print a test copy of your double-sided document to test the selected settings.
5. Follow any instructions displayed on the screen during printing.

**Double-sided Printing Options and Adjustments - Mac OS X**

**Parent topic:** Printing with Mac OS X 10.5, 10.6, or 10.7

**Double-sided Printing Options and Adjustments - Mac OS X**

You can select any of the available options in the **Two-sided Printing Settings** or **Output Settings** pop-up menu to set up your double-sided print job.

**Two-sided Printing Options**

**Long-Edge binding**

Orients double-sided printed pages to be bound on the long edge of the paper.

**Short-Edge binding**

Orients double-sided printed pages to be bound on the short edge of the paper.
Adjustments

Print Density
Sets the level of ink coverage for double-sided printing.

Increased Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

Managing Color - Mac OS X 10.5/10.6/10.7

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

   ![Color Matching](image)

   - ColorSync
   - EPSON Color Controls

2. Select one of the available options.

3. Select **Color Options** from the pop-up menu in the print window.

   ![Color Options](image)

   - Manual Settings
   - Fix Photo
   - Off (No Color Adjustment)
   - Advanced Settings

   **Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

   *Color Matching and Color Options - Mac OS X 10.5/10.6/10.7*

Click **Print** at the bottom of the print window.
Checking Print Status - Mac OS X 10.5/10.6/10.7

Parent topic: Printing with Mac OS X 10.5, 10.6, or 10.7

Checking Print Status - Mac OS X 10.5/10.6/10.7

During printing, you can view the progress of your print job, control printing, and check ink cartridge status.

1. Click the printer icon when it appears in the Dock.
   
   You see the print status window:
2. Select the following options as necessary:
   • To cancel printing, click the print job and click **Delete**.
   • To pause printing, click the print job and click **Hold**. To resume printing, click the print job marked "Hold" and click **Resume**.
   • To pause printing for all queued print jobs, click **Pause Printer**.
   • To check ink status, click **Supply Levels**.

**Parent topic:** Printing Your Document or Photo - Mac OS X 10.5/10.6/10.7

### Selecting Printing Preferences - Mac OS X 10.5/10.6/10.7

You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select **System Preferences**.
2. Select **Print & Fax** or **Print & Scan**, select your product, and select **Options & Supplies**.
3. Select **Driver**.

   You see this screen:
4. Select any of the available printing preferences.
5. Click OK.

**Printing Preferences - Mac OS X 10.5/10.6/10.7**

**Parent topic:** Printing with Mac OS X 10.5, 10.6, or 10.7

**Printing Preferences - Mac OS X 10.5/10.6/10.7**

You can select from these settings on the Driver tab.

**Thick paper and envelopes**
- Prevents ink from smearing when you print on envelopes or other thick paper.

**Skip Blank Page**
- Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**
- Lessens noise during printing when you select **Plain Paper/Bright White Paper** as the paper Type or Media Type setting.

**High Speed Printing**
- Speeds up printing, but may reduce print quality.

**Parent topic:** Selecting Printing Preferences - Mac OS X 10.5/10.6/10.7
Printing with Mac OS X 10.4

You can print with your product using any Mac OS X printing program, as described in these sections.

Selecting Page Setup Settings - Mac OS X 10.4
Selecting Basic Print Settings - Mac OS X 10.4
Selecting Print Layout Options - Mac OS X 10.4
Sizing Printed Images - Mac OS X 10.4
Selecting Double-sided Printing Settings - Mac OS X 10.4
Managing Color - Mac OS X 10.4
Selecting Printing Preferences - Mac OS X 10.4
Printing Your Document or Photo - Mac OS X 10.4

Parent topic: Printing From a Computer

Selecting Page Setup Settings - Mac OS X 10.4

Select the page setup settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the Page Setup command in your application.

   Note: You may need to select a print icon on your screen, the Page Setup option in the File menu, or another command. See your application's help utility for details.
3. Select your product as the **Format for** setting.

4. Select the size of the paper you loaded as the **Paper Size** setting. You can also select a custom setting to create a custom paper size.

5. Select the orientation of your document or photo as shown in the page setup window.

   **Note:** If you are printing an envelope, select the icon.

6. To reduce or enlarge the size of the printed image, select a different **Scale** setting.

7. Click **OK** to close the window.

**Parent topic:** Printing with Mac OS X 10.4

**Related tasks**

- Selecting Basic Print Settings - Mac OS X 10.4

**Selecting Basic Print Settings - Mac OS X 10.4**

Select the basic settings for the document or photo you want to print.
1. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

2. Select your product as the **Printer** setting.

   ![Printer Settings](image)

3. Select the **Copies** and **Pages** settings as necessary.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing.
4. Select **Print Settings** from the pop-up menu.

![Print Settings Window]

5. Select the **Paper Source** setting that indicates where you loaded the paper you want to print on.

6. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** Check the paper type settings list for details.

7. Select the **Print Quality** setting you want to use.

8. Select any of the available print options.

   - **Paper Source Options - Mac OS X 10.4**
   - **Print Quality Options - Mac OS X 10.4**

Paper Source Options - Mac OS X 10.4

You can select any of the available options in the Paper Source menu to print from paper loaded in that source.

**Auto Select**
Automatically selects the paper source based on the selected paper size.

**Rear MP Tray**
Selects the paper in the rear MP tray as the paper source.

**Paper Cassette 1**
Selects the paper in cassette 1 as the paper source.

**Paper Cassette 2**
Selects the paper in cassette 2 as the paper source.

*Note:* If your product only has one paper cassette, do not select **Paper Cassette 2**.

Parent topic: Selecting Basic Print Settings - Mac OS X 10.4

Print Quality Options - Mac OS X 10.4

You can select any of the available Print Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Economy**
For fast printing with reduced quality.

**Normal**
For everyday text and image printing.

**Fine**
For text and graphics with good quality and print speed.

**Quality**
For photos and graphics with good quality and print speed.

**High Quality**
For photos and graphics with high print quality.

**Best Quality**
For the best print quality, but the slowest print speed.

Parent topic: Selecting Basic Print Settings - Mac OS X 10.4
Print Options - Mac OS X 10.4
You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Flips the printed image left to right.

Parent topic: Selecting Basic Print Settings - Mac OS X 10.4

Selecting Print Layout Options - Mac OS X 10.4
You can select layout options for multi-page documents by selecting Layout from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the Pages per Sheet pop-up menu. To arrange the print order of the pages, select a Layout Direction setting.
- To print borders around each page on the sheet, select a line setting from the Border pop-up menu.

Parent topic: Printing with Mac OS X 10.4

Sizing Printed Images - Mac OS X 10.4
You can adjust the size of the image as you print it by selecting Paper Handling from the pop-up menu on the print window.
To adjust the order in which pages are printed, select one of the **Page Order** options.

To print only selected pages in a multi-page document, select one of the **Print** options.

To scale the image to fit on a specific paper size, select the **Scale to fit paper size** option and select a paper size from the pop-up menu.

**Parent topic:** Printing with Mac OS X 10.4

### Selecting Double-sided Printing Settings - Mac OS X 10.4

You can print on both sides of the paper by selecting **Two-sided Printing Settings** from the pop-up menu on the print window.
Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the **Two-sided Printing** options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the **Adjustments** options for that document type.

3. If necessary, customize the Adjustments settings as instructed on the screen.
4. Print a test copy of your double-sided document to test the selected settings.
5. Follow any instructions displayed on the screen during printing.

---

**Starting a Scan Using the Product Control Panel**

You can scan an image to your computer or to a USB device using your product’s control panel buttons. Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

1. Make sure you installed the product software and connected the product to your computer or network.

   **Note:** With Mac OS X 10.6/10.7, you must connect your product with a USB cable to scan using the buttons.

2. Press the **Scan** button.

   The scan options are displayed:
3. Press the arrow buttons to select a scan option and press the OK button.
   - **Scan to USB Device** saves your scan file on a USB flash drive or other device and lets you select the file format, resolution, and other settings.
   - **Scan to PC** saves your scan as a JPEG file to your computer or as an image capture in Mac OS X 10.6/10.7.
   - **Scan to PC (PDF)** saves your scan as a PDF file to your computer or as an image capture in Mac OS X 10.6/10.7.
   - **Scan to PC (Email)** scans your original and attaches it to a message in your e-mail program. You can select the e-mail program you want to use and resize your image, if necessary, from an option screen on your computer.

   **Note:** This works with MAPI-type email such as Microsoft Outlook, Windows Live Mail, Mac Mail, and Entourage, but not web-based email such as Gmail.

   - **Scan to PC (WSD)** lets you manage wireless scanning in Windows 7 or Windows Vista (English only).

   **Note:** To use this feature, you must first set up WSD (Web Services for Devices) on the computer you want to scan to.

4. To scan to your computer, you first need to select how you connected your product to your computer:
   - If your product is connected directly to your computer with a USB cable, select **USB Connection**.
• If your product is connected to your computer over a network, select the computer name from the list.

5. To select 2-sided scanning to your computer (for documents in the ADF), press the Menu button, press the OK button to select Scan Settings, then press the OK button to select 2-Sided Scanning. Select On, then press the OK button. Press the Menu button to exit.

6. Press the Start Color button to start scanning.

Changing Default Scan Button Settings
You can view or change the default scan settings your product uses when you scan using the product buttons. You do this using the Event Manager program.

1. Do one of the following to open Event Manager:
   - Windows: Click 🔄 or Start > All Programs or Programs > Epson Software > Event Manager.
   - Mac OS X 10.4/10.5: Open the Applications folder, click Epson Software, and click Event Manager.
2. Click Make Job Settings.
3. Open the Edit Job Settings drop-down list and select the scan button settings you want to view or change.
4. Change the settings as necessary.
5. Click OK.

Parent topic: Starting a Scan Using the Product Control Panel

Starting a Scan Using the Epson Scan Icon
You can start the Epson Scan program to select scan settings, scan, and save the scanned image to a file.

• Windows: Double-click the EPSON Scan icon on your computer desktop.
• **Mac OS X**: Open the *Applications* folder, open the *Epson Software* folder, and double-click the *EPSON Scan* icon.

**Note**: You cannot use Epson Scan with Mac OS X 10.6/10.7.

You see the Epson Scan window:
Starting a Scan from a Scanning Program

You can start Epson Scan from a scanning program to select scan settings, scan, and open the scanned image in the program.

Note: You cannot use Epson Scan with Mac OS X 10.6/10.7.

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)
2. Select your product.

Note: In certain programs, you may need to select your product as the "source" first. If you see a Select Source option, choose it and select your product. With Windows, do not select a WIA option for your product; it will not work correctly.

You see the Epson Scan window:

Scanning in Home Mode

When you scan in Home Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Home Mode** as the Mode setting.

   You see this window:
2. Select the **Document Type** setting that matches your original, such as **Photograph** or **Text/Line Art**.

3. Select the **Image Type** setting that matches your original.
4. Select the way you plan to use your scanned image as the **Destination** setting. (The Resolution setting is selected automatically based on the Destination setting you choose.)
   - **Screen/Web**: Select this option for images you will e-mail, view on a computer screen, or post on the web.
   - **Printer**: Select this option for images you will print or documents you will convert to editable text using OCR (Optical Character Recognition) software.
   - **Other**: Select this option if you want to select a custom resolution for your image.

5. If you selected **Other** in the last step, select the **Resolution** setting you want to use for your scan.

6. Click the **Preview** button.
   Epson Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scan area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

9. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

10. Click **Scan**.
    You see the File Save Settings window.

11. Change any of the necessary file save settings and click **OK**.
    Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Selecting Scan File Settings
Selecting a Scan Area - Home Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

**Note:** In Home Mode, the default Preview mode is Thumbnail mode. To use Normal Preview mode instead, deselect the Thumbnail checkbox beneath the Preview button, then click the Preview button to preview your image again.

1. Do one of the following to select your scan area in the Preview image:
   - **Thumbnail preview:** Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
• **Normal preview**: Click the Auto Locate icon to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)
• **Normal preview**: To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

  • To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

**Parent topic:** Scanning in Home Mode

**Available Image Adjustments - Home Mode**

You can select these Image Adjustments options in Epson Scan Home Mode.

![Image Adjustments](image)

**Note:** Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments. Not all adjustment settings may be available, depending on the Document Type and Image Type setting.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Color Restoration**

Restores the colors in faded photos automatically.

**Backlight Correction**

Removes shadows from photos that have too much background light.

**Dust Removal**

Removes dust marks from your originals automatically.

**Text Enhancement**

Sharpens the appearance of letters in text documents.
Auto Area Segmentation
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Parent topic: Scanning in Home Mode

Selecting a Scan Size - Home Mode
You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.

2. In the Epson Scan window, select the size you want your scanned image to be from the Target Size list.

   ![Target Size](image)

   **Note:** If you need to rotate the orientation of the target size for your image, click the Orientation icon.

   A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Adjust the scan area as necessary.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

![Target Size dialog box](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image. The marquee is automatically proportioned for your custom scan size.

**Parent topic:** Scanning in Home Mode

### Scanning in Office Mode

When you scan in Office Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Office Mode** as the Mode setting.
   
   You see this window:
2. Select the **Image Type** setting that matches your original.
3. Select the **Document Source** setting indicating where you placed your original. To scan a 2-sided document in the ADF, select **ADF-Double-sided**.
4. Select the **Size** and **Orientation** settings that match your original.
5. Select the **Resolution** setting you want to use for your scan.
6. Click the **Preview** button.
Epson Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scanned image area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scanned image area in the Preview window.

9. Click **Scan**.
   
   You see the File Save Settings window.

10. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Scanning in Professional Mode

When you scan in Professional Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select Professional Mode as the Mode setting.
   You see this window:
2. Select the **Document Type** setting that matches your original, such as **Reflective** for documents or photos.

3. Select the **Document Source** setting indicating where you placed your original. To scan a 2-sided document in the ADF, select **ADF - Double-sided**.

4. Select the specific type of original you are scanning as the **Auto Exposure Type** setting: **Document** or **Photo**.

5. Select the details of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Click the **Preview** button.

   Epson Scan previews your original and displays the result in a separate Preview window.

8. If desired, select the area in your preview image that you want to scan (scan area).

9. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scanned image area in the Preview window.

10. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

11. Click **Scan**.

    You see the File Save Settings window.

12. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Available Image Types - Professional Mode

You can select these Image Type options in Epson Scan Professional Mode.

**24-bit Color**
Select this setting for color photos.

**Color Smoothing**
Select this setting for color graphic images, such as charts or graphs.

**8-bit Grayscale**
Select this setting for black-and-white photos.

**Black & White**
Select this setting for black text documents or line art.

Parent topic: Scanning in Professional Mode

Selecting a Scan Area - Professional Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

**Note:** In Professional Mode, the default Preview mode is Normal mode. To use Thumbnail Preview mode instead, select the Thumbnail checkbox beneath the Preview button, then click the **Preview** button to preview your image again.

1. Do one of the following to select your scan area in the Preview image:

   - **Normal preview:** Click the Auto Locate icon to create a marquee (dotted line) on the preview image.
• **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)
• Normal preview: To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

Parent topic: Scanning in Professional Mode

Available Image Adjustments - Professional Mode

You can select these Adjustments options in Epson Scan Professional Mode.

![Adjustments settings](image)

Note: Not all adjustment settings may be available, depending on the Image Type setting.

Click the image adjustment icon to access additional settings.

Click the + (Windows) or ▶ (Mac OS X) icon next to a setting to change the level of adjustment.

**Unsharp Mask**

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)
**Color Restoration**  
Restores the colors in faded photos automatically.

**Backlight Correction**  
Removes shadows from photos that have too much background light.

**Dust Removal**  
Removes dust marks from your originals automatically.

**Auto Exposure**  
Automatically adjusts the image exposure settings when you click the Auto Exposure icon. To automatically adjust image exposure settings continuously, click the Configuration button, click the Color tab, and select Continuous auto exposure. You can adjust the level of exposure adjustment using a slider.

**Histogram Adjustment**  
Provides a graphical interface for adjusting highlight, shadow, and gamma levels individually. (For advanced users only.) Click the histogram icon to access the settings.

**Tone Correction**  
Provides a graphical interface for adjusting tone levels individually. (For advanced users only.) Click the tone correction icon to access the settings.

**Brightness**  
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**  
Adjusts the difference between the light and dark areas of the overall scanned image.

**Saturation**  
Adjusts the density of colors in the overall image.

**Color Balance**  
Adjusts the balance of colors in the overall image.

**Color Palette**  
Provides a graphical interface for adjusting mid-tone levels, such as skin tones, without affecting the highlight and shadow areas of the image. (For advanced users only.) Click the Color Palette icon to access the settings.

**Threshold**  
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Parent topic:** Scanning in Professional Mode
Selecting a Scan Size - Professional Mode

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.

2. In the Epson Scan window, select the size you want your scanned image to be from the Target Size list.

   ![Target Size](image)

   **Note:** If you need to rotate the orientation of the target size for your image, click the orientation icon.

   A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Adjust the scan area as necessary.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

![Customize Target Size](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image.

   The marquee is automatically proportioned for your custom scan size.

6. To use additional sizing tools, click the + (Windows) or ▶ (Mac OS X) icon next to the Target Size setting and select options as desired.

![Additional sizing tools](image)

- **Scale**: Reduces or enlarges your image by the percentage you enter.
- **Trimming**: Turns automatic image cropping on or off.
• Unlock icon: Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

Parent topic: Scanning in Professional Mode

Image Preview Guidelines

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available:

**Thumbnail preview**
A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected. If the Thumbnail checkbox is selected, clicking the Preview button opens a thumbnail preview.

**Normal preview**
A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually. If the Thumbnail checkbox is deselected, clicking the Preview button opens a normal preview.

Parent topic: Selecting Epson Scan Settings

Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan. Follow these guidelines to determine the resolution setting you need:

• You will enlarge the image as you scan it.
  
  If you will enlarge the image using Epson Scan's Target Size setting (Home and Professional modes only), you do not need to increase the Resolution setting.

• You will scan the image at its original size, but enlarge it later in an image-editing program.
  
  Increase Epson Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

• You will scan the image at 100% or smaller size.
  
  Select Epson Scan's Resolution setting based on how you will use the scanned image:
  • E-mail/view on a computer screen/post on the web: 96 to 150 dpi
  • Print/convert to editable text (OCR): 300 dpi
  • Fax: 200 dpi
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how Epson Scan behaves when you scan and save files.

The File Save Settings window may appear after you click **Scan** on the Epson Scan window. You can also access the window by clicking the **Scan** icon on the Epson Scan window.
1. Do one of the following to select the folder in which you want to save your scanned image:
   • Click the button for one of the displayed folders.
   • Click the Other button, click the Browse or Choose button, and select a folder.
2. Type in a stem file name in the Prefix field. This name is used along with numbers to automatically name your scanned files.
3. Select a different number as the Start Number setting, if you like.
4. Select the file format you want to use in the Image Format Type menu.
5. If your file format provides optional settings, click the Options button to select them.
6. Choose any of the optional settings you want to use by selecting their checkboxes.
7. Click OK.

Available Scanned File Types and Optional Settings

Parent topic: Selecting Epson Scan Settings

Available Scanned File Types and Optional Settings

You can select from a variety scanned file types and optional settings on the File Save Settings window in Epson Scan.

File Formats

Bitmap (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The Tiff format is recommended when you need to modify or retouch your scanned image.)

Multi-Tiff (*.tif)
A Tiff file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and Mac OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

PICT (*.pct)
A standard image file format for most Mac OS X programs.
PRINT Image Matching II (*.jpg or *.tif)
File formats that include Epson PRINT Image Matching II data for enhanced quality and a wider color range (does not affect the way the image displays on the screen).

Tiff (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Optional Settings

Overwrite any files with the same name
Select to overwrite previous files with the same names.

Show this dialog box before next scan
Select to have the File Save Settings window appear automatically before you scan.

Open image folder after scanning
Select to have Windows Explorer or Mac OS X Finder automatically open to the folder where your scanned image is saved after scanning.

Show Add Page dialog after scanning
If you are scanning a multi-page document using the PDF or Multi-Tiff format, select to display a prompt for scanning additional pages after the first page is scanned.

Parent topic: Selecting Scan File Settings

Scanning with Mac OS X 10.6/10.7
With Mac OS X 10.6/10.7, you can scan with your product using an image-editing application.

Note: You cannot use the Epson Scan program to scan with Mac OS X 10.6/10.7.

1. Open an image editing application, such as Image Capture.
2. Select your Epson product from the DEVICES or SHARED list, if necessary.
   You see this window:
3. Click **Show Details**.
4. Select your scan settings as necessary.
5. Select the folder in which you want to save your scanned file in the **Scan To** pop-up menu.
6. Click **Scan**.
   
   Your scanned file is saved in the folder you selected.

### Scanning Special Projects

Your product's scanning software offers various options to help you quickly complete special scan projects.

- Scanning to a PDF File
- Restoring Photo Colors as You Scan
- Convert Scanned Documents to Editable Text (OCR)

**Parent topic:** Scanning
Scanning to a PDF File

Using Epson Scan, you can scan a multi-page document and save it in one PDF (Portable Document Format) file on your computer.

1. Place your original on your product for scanning.
2. Start Epson Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. When you finish selecting all your settings, click Scan.

You see the File Save Settings window.
7. Select **PDF** as the Type setting.
8. Select any other settings you want to use on the File Save Settings window.
9. Click **OK**.

Epson Scan scans your document and you see this window:
10. Choose one of the following options on the screen:

- If you are scanning only one page, click **Save File**.
- If you need to scan additional pages in a document, click **Add Page**. Place additional pages on the product for scanning, click **Scan**, and repeat until you have scanned all the pages. When you are finished, click **Save File**.
- If you need to delete or reorder the scanned pages, click **Edit Page**. Delete or reorder the pages using the icons that appear on the bottom of the editing window. When you are finished, click **OK**.

**Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen indicating the program is converting your page to text. Wait until the program re-scans the page and close the program, if necessary.

11. Click **Close** to exit the Epson Scan window, if necessary.

Epson Scan scans your original, and saves the PDF file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the document, if desired.

Restoring Photo Colors as You Scan

You can restore the colors in faded photos as you scan them using Epson Scan’s Color Restoration setting. You can select this setting in any of the available scan modes.

1. Place your original on your product for scanning.
2. Start Epson Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. Locate or access the image adjustment settings.
7. Select the **Color Restoration** checkbox.

8. When you finish selecting all your settings, click **Scan**.
9. Click **Close** to exit the Epson Scan window, if necessary.

Epson Scan scans your original, and saves the color-restored file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Convert Scanned Documents to Editable Text (OCR)

You can scan a document and convert the text into data that you can edit with a word processing, spreadsheet, or HTML-editing program. This process is called OCR (Optical Character Recognition).

To scan and use OCR, you need to install an OCR program, such as ABBYY FineReader.

**Note:** You can use ABBYY FineReader to convert scanned documents to editable text in Mac OS X 10.6. First, scan and save your document using an application such as Image Capture. Then open ABBYY FineReader, open the Get Images From pop-up menu and select File. Select the conversion option you want to use, then select your scanned file and follow the instructions on the screen.

**Note:** ABBYY FineReader is not supported on Mac OS X 10.7. Check the Epson support site at www.epson.com/support/lion (U.S.) or www.epson.ca/support/lion (Canada) to learn about possible updates to the software.

**Scanning Using OCR - Windows**

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Place your original on your product for scanning.

2. Click or Start > All Programs or Programs > ABBYY FineReader Sprint > ABBYY FineReader Sprint.

You see this window:
3. Select the language used in the document you are going to scan as the **Document Language** setting.

4. Click the **Scan to Other Formats** icon.
   
   You see the Select Scanner window.

5. Select your product and click **OK**.

   **Note:** Do not select a **WIA** option for your product; it will not work correctly.

   You see the scan settings window.

6. Select your scan settings.

7. Click **Preview** and adjust the area you want to scan, if necessary.

8. Click **Scan**.

   **Note:** To scan a multi-page document, select settings in the Multi-Page Scanning section and click **Scan** for each page.

9. When you are finished scanning, click **Close**.
Your document is scanned and processed into editable text, then you see the Save As window.

10. Select a name and a file format for your document and click Save.

The file is saved and then opened in an application associated with the file type you selected, if available on your system.

Parent topic: Convert Scanned Documents to Editable Text (OCR)

Scanning Using OCR - Mac OS X 10.4 or 10.5

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Place your original on your product for scanning.
2. Open the Applications folder and click the ABBYY FineReader Sprint icon.

You see this window:
3. Open the **Get Images From** pop-up menu and select your product.
4. Select the language used in the document you are going to scan as the **Document Language** setting.
5. Select the type of document you are going to scan. Epson Scan starts in the last scan mode you used.
6. Select your scan settings and click **Scan**.
   Your document is scanned and you see the Epson Scan window while your document is converted to editable text.
7. Click **Close** to close the Epson Scan window and Preview window, if necessary.
   You see the Save Converted File As window:

   ![Save Converted File As window](image)

8. Click the **Save** button.
   The file is saved and then opened in an application associated with the file type you selected, if available on your system.

**Parent topic:** Convert Scanned Documents to Editable Text (OCR)
Faxing

See these sections to fax using your product.

**Note:** This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

Connecting a Telephone or Answering Machine
Setting Up Fax Features
Setting Up Speed Dial and Group Dial Lists
Sending Faxes
Receiving Faxes

**Connecting a Telephone or Answering Machine**

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

**Note:** If you do not connect a telephone to your product, make sure to turn on **Auto Answer**. Otherwise, you cannot receive faxes.
1. Connect the phone cable to your telephone wall jack and to the **LINE** port on your product.

**Note:** If your telephone line included a DSL Internet connection, you must connect a DSL filter to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL provider for the necessary filter.
1. Telephone wall jack
2. DSL filter
3. DSL modem

2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the EXT port on your product.
3. Connect the second phone cable to your telephone or answering machine and to the EXT port on your product.

![Connection Diagram]

**Note:** If you connect an answering machine and **Auto Answer** is turned on, make sure the product’s **Rings to Answer** setting is set higher than the number of rings your answering machine is set to answer a call.

Any phone or answering machine must be connected to the EXT port for your product to detect an incoming fax call when the phone is picked up. Epson cannot guarantee compatibility with VoIP, cable phone systems, or fiberoptic digital services such as FIOS.

Setting Up Fax Features Using the Product Control Panel

See these sections to set up fax features using the product control panel.

Selecting Your Country or Region
Selecting the Date and Time
Entering Fax Header Information
Entering Numbers and Characters for Faxing
Selecting Fax Send and Receive Settings
Selecting Fax Communication Settings
Printing Fax Reports
Restoring Default Fax Settings
Fax Sending Options
Fax Receive Options
Fax Communications Options
Fax Report Options
Restore Default Settings Options

Parent topic: Setting Up Fax Features

Selecting Your Country or Region

Before faxing, select the country or region in which you are using your product.

Note: If you change the country or region, your fax settings return to their defaults and you must select them again.

1. Press the Setup button.

2. Press the arrow buttons to select **Printer Setup** and press the **OK** button.
   You see this screen:

![Printer Setup Screen](image)

3. Select **Country/Region** and press the **OK** button.
4. Select your country or region and press the **OK** button.
   You see a confirmation screen.
5. If the setting is correct, select **Yes** and press the **OK** button. (If not, select **No** and retry.)
   
   **Note:** Changing the country or region will restore the fax settings to the default settings.
Selecting the Date and Time

Before faxing, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

1. Press the **Setup** button.

2. Press the arrow buttons to select **Printer Setup** and press the **OK** button.

   You see this screen:

3. Select **Date/Time** and press the **OK** button.
You see this screen:

4. Select the date format you want to use and press the **OK** button.

5. Use the number buttons on the control panel to enter the current date, then press the **OK** button.

6. Select the time format you want to use and press the **OK** button.

7. Use the number buttons on the control panel to enter the current time, select **AM** or **PM** if you selected a 12-hour time format, then press the **OK** button.

8. Select **Daylight Saving Time** and press the **OK** button.

9. Select one of the following settings for the current conditions in your area and press the **OK** button:
   - **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)
   - **Winter**: it is fall or winter or your region does not use Daylight Saving Time (DST)

After making a selection, you return to the **Printer Setup** screen.

**Note:** If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets the clock back one hour.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

**Entering Fax Header Information**

Before faxing, add your sender name and fax number to the fax header to identify the source of the faxes you send.
1. Press the **Setup** button.

![Setup menu](image1)

2. Press the arrow buttons to select **Fax Settings** and press the **OK** button.
   You see this screen:

![Fax Settings menu](image2)

3. Select **Communication** and press the **OK** button.
4. Select **Header** and press the **OK** button.
5. Press the **OK** button to select **Fax Header**.
   You see this screen:
6. Use the keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters.

7. Select **Done** and press the **OK** button to return to the Header menu.

8. Select **Your Phone Number** and press the **OK** button.

9. Use the numeric buttons on the control panel to enter your fax number, up to 20 characters. You do not need to use dashes. For international numbers that require use of a + symbol, press the # button.

10. Press the **OK** button to return to the Header menu.

11. Press the **Copy** button to exit.

Fax Send Options

Parent topic: Sending Faxes

Manually Dialing or Redialing Fax Numbers

You can send a fax from your product control panel by manually dialing the fax number or redialing the last dialed fax number.

1. Place your original on the product for faxing.
2. Press the Fax button.
3. Do one of the following:
   • Use the numeric keypad to enter the fax number. You can enter up to 64 characters.
   • Press the Redial/Pause button to redial the last dialed fax number.
4. If you need to change any fax settings, press the \( \text{Menu} \) button, select \textit{Send Settings}, press the \( \text{OK} \) button, and select your settings. When you finish selecting settings, press the \( \text{Menu} \) button.

5. Press one of the \( \text{Start} \) buttons.

   \textbf{Note:} If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white. To cancel faxing, press the \( \text{Stop/Reset} \) button.

Your product scans your original and prompts you to place additional pages, if necessary.

After scanning your originals, your product dials the number and sends the fax.

\textbf{Note:} If the number is busy or there is a communication problem, your product displays a redialing message and will redial the number in a few minutes.

\textbf{Parent topic:} Sending Faxes from the Product Control Panel

\textbf{Selecting Fax Numbers From Speed or Group Dial Lists}

You can send a fax from your product control panel by selecting a speed dial or group dial entry from the list.

1. Place your original on the product for faxing.
2. Press the \( \text{Fax} \) button.
3. Press the \( \text{Speed Dial} \) button.
4. If you want to select a group dial entry, press the \( \text{Menu} \) button.
5. Select the speed dial or group dial entry you want to fax, then press the OK button.

6. If you need to change any fax settings, press the Menu button, select Send Settings, press the OK button, and select your settings. When you finish selecting settings, press the Menu button.

7. Press one of the Start buttons.

   **Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white. To cancel faxing, press the Stop/Reset button.

   Your product scans your original and prompts you to place additional pages, if necessary.

   After scanning your originals, your product dials the number and sends the fax.

   **Note:** If the number is busy or there is a communication problem, your product displays a redialing message and will redial the number in a few minutes.

**Parent topic:** Sending Faxes from the Product Control Panel

Dialing Fax Numbers from a Connected Telephone

If you have connected a telephone to the EXT. port on your product, you can send a fax by dialing the fax number from the connected telephone.

1. Place your original on the product for faxing.

2. Press the Fax button.

3. Dial the fax number from the connected telephone.
You see this screen:

![Information screen with options: Send, Receive, OK Proceed]

4. Using your product control panel, select **Send** and press the **OK** button.

   **Note:** Your product now communicates with the recipient's fax machine. Do not hang up the telephone.

5. If you need to change any fax settings, press the **Menu** button, select **Send Settings**, press the **OK** button, and select your settings. When you finish selecting settings, press the **Menu** button.

6. Press one of the **Start** buttons.

   **Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white. To cancel faxing, press the **Stop/Reset** button.

   Your product scans your original and prompts you to place additional pages, if necessary.

7. Hang up the telephone.

   After scanning your originals, your product sends the fax.

**Parent topic:** Sending Faxes from the Product Control Panel

Parent topic: Sending Faxes from the Product Control Panel

**Sending Faxes Using the Fax Utility - Windows**

You can send a fax from a printing program in Windows.

1. Open the file you want to fax and select **Print**.
2. Select your product with the FAX option as the printer.

3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the Preferences or Properties button.

   **Note:** If you see a Setup, Printer, or Options button, click it. Then click Preferences or Properties on the next screen. For more information about selecting fax print settings, click Help.

4. Select the Page Range as necessary. (Leave the Number of copies set to 1.)

   **Note:** You can fax up to 100 pages, including the cover sheet.

5. Click **Print**.

   If you’re faxing for the first time, you see a window like this one:
6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.

7. Add a cover sheet, input a fax number, or set up a phone book of numbers for future use, then click **Next**.

   **Note**: For detailed instructions on using the Epson FAX Utility, click **Help**.

8. If you added a cover sheet to your fax, select a cover sheet style, enter your subject and comment information, then click **Next**.

9. Click **Send** to transmit your fax.

**Parent topic**: Sending Faxes

### Sending Faxes Using the Fax Utility - Mac OS X

You can send a fax from a Mac OS X printing program using the Fax Utility. You can fax up to 100 pages at a time, including a cover sheet.
1. Open a photo or document for faxing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. Select your product **FAX** option as the **Printer** setting.
4. Select the number of pages you are faxing as the **Pages** setting.

   **Note:** Leave the **Copies** setting set to **1**.

5. Select **Recipient Settings** from the pop-up menu.

   You see this window:
6. Do one of the following to choose your recipient:
   • Select a name or group from the **Recipient List**.
   • Enter a name, company, and fax number and click the + button.
   • Click the icon and select a recipient from your address book.

7. Select **Fax Settings** from the pop-up menu.
   You see this window:
8. Select the **Color** and **Image Quality** settings you want to use for your fax.

9. Click **Fax**.

**Parent topic:** Sending Faxes

## Receiving Faxes

See these sections to receive faxes with your product.

- Fax Reception
- Receiving Faxes Automatically (Auto Answer)
- Receiving Faxes Manually

**Parent topic:** Faxing
Fax Reception

Your product will automatically receive and print faxes when you set fax reception mode to Auto Answer.

If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.

Note: If you run out of paper during fax printing, load more paper and press the button indicated on your product LCD screen to continue.

Parent topic: Receiving Faxes

Receiving Faxes Automatically (Auto Answer)

To receive and print faxes automatically, you can turn on Auto Answer mode.

Check the Auto Answer light on your product to see if Auto Answer mode is turned on or not.

To turn Auto Answer mode on or off, press the Auto Answer button.

If an answering machine is connected, make sure the product's Rings to Answer setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

If a telephone is connected, and you use it to answer a call that turns out to be a fax, wait until the product’s LCD screen displays a message that a connection has been made before hanging up.

Parent topic: Receiving Faxes

Receiving Faxes Manually

You can set up your product to receive faxes manually by turning off Auto Answer mode. This lets you check for a fax tone on the connected telephone before receiving a fax.

1. When the connected telephone rings, answer the call.
   - You see this message on your product's LCD screen:
2. If you hear a fax tone, select the **Receive** option and press the **OK** button.

   **Note:** Leave the answered call active as you receive the fax transmission.

3. Follow the instructions on the screen to receive the fax.
   When fax transmission is finished, you see the previous LCD screen.

4. Press the **OK** button to print the fax.

5. Hang up the phone.

**Parent topic:** [Receiving Faxes](#)
Replacing Ink Cartridges and Maintenance Boxes

The maintenance box stores ink that gets flushed from the system during print head cleaning. When an ink cartridge is expended or the maintenance box is at the end of its service life, you need to replace it. You may also need to replace a cartridge that is more than six months old if your printouts do not look their best, even after cleaning and aligning the print head.

Note: Please dispose of your used Epson branded ink cartridges and maintenance boxes responsibly and in accordance with local requirements. If you would like to return your used ink cartridges and maintenance boxes to Epson for proper disposal, please go to www.epson.com/recycle for more information.

Replacing the Maintenance Box

Purchase Epson Ink Cartridges and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at Epson Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Note: We recommend that you use genuine Epson maintenance boxes and cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

Part of the ink from the included set of cartridges is used for priming the printer. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.
Caution: Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

1. Turn on your product.
2. If an ink cartridge is low or expended, a message appears on your product and on your computer screen. Note which cartridges need to be replaced.
3. Open the front cover.
4. Push the ink cartridge in, then pull it out of the slot.
Note: Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.

5. Remove the cartridge from the package.

Caution: Do not touch the green chip on the cartridge. Install the new cartridge immediately after removing the old one; if you do not, the print head may dry out and be unable to print.

6. Gently shake the ink cartridge horizontally for about five seconds as shown.
**Caution:** Do not remove any labels or seals, or ink will leak.

7. Insert the new cartridge into the holder and push it in until it clicks into place.

8. When you are finished, close the front cover.
After the product checks the cartridges, ink replacement is complete. If you see an error message on the LCD screen, an ink cartridge may not be installed properly. Remove the ink cartridge and reinstall it to clear the error.

**Note:** Do not turn off the printer during ink replacement.

If you remove a low or expended ink cartridge, you cannot re-install and use the cartridge.

**Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

### Replacing the Maintenance Box

Make sure you have a new maintenance box before you begin.

**Caution:** Do not reuse a maintenance box that has been removed and left uninstalled for more than a week. Keep the maintenance box away from direct sunlight.

1. Make sure the product is not printing.
2. Remove the new maintenance box from its package.

**Caution:** Do not touch the green chip on the maintenance box.
3. Press the buttons on the sides of the duplexer (rear unit) and remove it.

4. Grasp the maintenance box as shown and pull it out of its holder.

**Note:** Do not tilt the used maintenance box or take it apart.
Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep the maintenance box out of the reach of children and do not drink the ink.

5. Place the used maintenance box in the plastic bag that came with the new maintenance box. Seal the bag and dispose of it carefully.

6. Insert the new maintenance box into the holder and push it all the way in.
7. Press the buttons on the sides of the duplexer (rear unit) and reattach it.

Checking the Nozzles Using the Product Control Panel

You can check the print head nozzles using the control panel on your product.

1. Make sure plain paper is loaded in the product.
2. Press the \textit{Setup} button.
3. Press the arrow buttons to select **Maintenance** and press the **OK** button. You see this screen:

![Maintenance screen]

4. Press the **OK** button. You see this screen:

![Print nozzle check pattern]

5. Press one of the **Start** buttons. After the nozzle pattern prints, you see this screen:
6. Check the printed pattern to see if there are gaps in the lines.

   **Print head is clean**

   ![Print pattern example]

   **Print head needs cleaning**

   ![Print pattern example]

7. Do one of the following:
   - If there are no gaps, select **Finish Nozzle Check** and press the **OK** button. Press the **Copy** button to exit.
   - If there are gaps or the pattern is faint, select **Head Cleaning** and press the **OK** button and continue.

8. Follow the instructions on the screen to clean the print head, check the nozzles, and repeat the process as necessary.
If you don’t see any improvement after cleaning the print head up to 4 times, wait at least 6 hours. Then try cleaning the print head again. If quality still does not improve, one of the ink cartridges may be old or damaged and needs to be replaced.

Parent topic: Print Head Nozzle Check

Checking the Nozzles Using a Computer Utility

You can check the print head nozzles using a utility on your Windows or Mac computer.

1. Load a few sheets of plain paper in the product.
2. Do one of the following:
   • **Windows**: Right-click the product icon in the Windows taskbar.
   • **Mac OS X 10.6/10.7**: In the Apple menu or the Dock, select *System Preferences*. Select *Print & Fax* or *Print & Scan*, select your product, and select *Options & Supplies*. Select *Utility* and select *Open Printer Utility*.
   • **Mac OS X 10.4/10.5**: In the Apple menu or the Dock, select *System Preferences*. Select *Print & Fax*, select your product, and select *Open Print Queue* or *Print Queue*. Select *Utility*.
3. Select **Nozzle Check**.

You see one of these windows:
4. Click **Print**.

5. Check the printed pattern to see if there are gaps in the lines.
   
   **Print head is clean**
   
   ![Print head is clean pattern]

   **Print head needs cleaning**
   
   ![Print head needs cleaning pattern]

6. If there are no gaps, click **Finish**.
   
   If there are gaps or the pattern is faint, clean the print head.
Print Head Cleaning

If print quality has declined and the nozzle check pattern indicates clogged nozzles, you can clean the print head.

**Note:** You cannot clean the print head if an ink cartridge is expended, and may not be able to clean it when a cartridge is low. You must replace the cartridge first.

### Cleaning the Print Head Using a Computer Utility

You can clean the print head using a utility on your Windows computer or Mac.

1. Load a few sheets of plain paper in the product.

2. Do one of the following:
   - **Windows:** Right-click the product icon in the Windows taskbar.
   - **Mac OS X 10.6/10.7:** In the Apple menu or the Dock, select **System Preferences.** Select **Print & Fax** or **Print & Scan,** select your product, and select **Options & Supplies.** Select **Utility** and select **Open Printer Utility.**
   - **Mac OS X 10.4/10.5:** In the Apple menu or the Dock, select **System Preferences.** Select **Print & Fax,** select your product, and select **Open Print Queue** or **Print Queue.** Select **Utility.**

3. Select **Head Cleaning.**

You see one of these windows:
Select one of the radio buttons below according to the result of the nozzle check, and then click [Start] to clean the print head nozzles. Because cleaning consumes some ink from some ink cartridges, only clean the print head when faint areas or gaps appear in your printout. Use the "Nozzle Check" utility first to confirm that the print head needs to be cleaned.

- All Colors
- All except Black
- Black Only
4. Select the cleaning cycle you want to run, based on the nozzle check pattern.

5. Click Start to begin the cleaning cycle.

   The power light flashes throughout the cleaning cycle and stays on when the cleaning cycle is finished.

   **Caution:** Never turn off the product during a cleaning cycle or you may damage it.

6. When the power light stops flashing and remains on, you can check to see if the nozzles are clean; click **Print Nozzle Check Pattern** and click **Print**.

7. Check the printed pattern to see if there are gaps in the lines.

   **Print head is clean**
Print head needs cleaning

• If there are no gaps, click **Finish**.
• If there are gaps or the pattern is faint, click **Clean** to clean the print head again.

If you don’t see any improvement after cleaning the print head up to 4 times, wait at least 6 hours. Then try cleaning the print head again. If quality still does not improve, one of the ink cartridges may be old or damaged and needs to be replaced.

**Aligning the Print Head Using the Product Control Panel**

You can align the print head using the control panel on your product.

1. Make sure plain paper is loaded in the product.
2. Press the **Setup** button.
3. Press the arrow buttons to select **Maintenance** and press the **OK** button.

You see this screen:
4. Select **Head Alignment** and press the **OK** button.
   
   You see this screen:

   ![Screen showing Head Alignment option]

5. Press one of the **Start** buttons to print an alignment sheet.

   **Note:** Do not cancel printing while you are printing a head alignment pattern.

   You see this screen:
6. Check the printed pattern and press the arrow buttons to choose the number representing the best printed pattern for each set. Press the OK button after each selection, then press the OK button when you are done.

Parent topic: Print Head Alignment

Aligning the Print Head Using a Computer Utility

You can align the print head using a utility on your Windows computer or Mac.

1. Load a few sheets of plain paper in the product.
2. Do one of the following:
   - Windows: Right-click the product icon in the Windows taskbar.
   - Mac OS X 10.6/10.7: In the Apple menu or the Dock, select System Preferences. Select Print & Fax or Print & Scan, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
   - Mac OS X 10.4/10.5: In the Apple menu or the Dock, select System Preferences. Select Print & Fax, select your product, and select Open Print Queue or Print Queue. Select Utility.
3. Select Print Head Alignment.
4. Click Next, then click Print to print an alignment sheet.

   Note: Do not cancel printing while you are printing a head alignment pattern.

You see one of these windows:
Look at the alignment sheet.

Find the square without any visible bands in sets #1 through #3. Select the number that corresponds to that square from the list below for all sets. Then click [Next >].

If every square contains a band, select the square with the thinnest band or bands. Then click [Realignment].

- #1: 5
- #2: 5
- #3: 5

[Realignment] [Cancel] [Next >]
5. Check the printed pattern and follow the instructions on the screen to choose the number representing the best printed pattern for each set.
   • After choosing each pattern number, click **Next**.
   • If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

   **Note:** Click **Skip** (where available) if you want to skip a particular alignment sheet.

6. When you are done, click **Finish**.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Disconnect the power cable and any connected interface cables.
3. Remove all the paper from the rear MP tray.
4. Clean the rear MP tray using a soft brush.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Open the ADF cover and use a soft, dry, lint-free cloth (microfiber is recommended), to clean the rollers and the interior of the ADF.
7. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to ship your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.

1. Turn off the product.
2. Remove all the paper from the product.
3. Unplug any connected cables.
4. Close the paper support, feeder guard, and output tray as shown.

5. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product. Make sure the box adequately protects the product control panel. Keep the product level during transportation. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. You can select Download the Latest Software from the Home screen of this manual or visit Epson's driver download site (U.S. downloads or Canadian downloads).

With Windows, your printer software automatically checks for updates. You can also manually update the software by selecting Driver Update here:

• Right-clicking the product icon in the Windows taskbar
• On the Maintenance tab in the printer settings window
• In the EPSON program group under your product name

Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load plain paper in the product.
3. Press the **Setup** button.
4. Press the arrow buttons to select **Maintenance** and press the **OK** button.
   You see this screen:

   ![Maintenance Screen]

5. Press the **OK** button.
   You see this screen:
6. Press one of the Start buttons.
   After the nozzle pattern prints, you see this screen:

   ![Image of nozzle check pattern]

   Print nozzle check pattern on Letter/A4 size plain paper.
   Press △ or ▽.

   ![Image of printer menu]

   Finish Nozzle Check
   Head Cleaning

   If any segments are missing from the printed pattern, clean the print head.

7. Do the following, depending on the results of the product check:
   • If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.
   • If the page prints but the nozzle check pattern has gaps, clean or align the print head.
• If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

## Solving Setup Problems

Check these sections if you have problems while setting up your product.

- Noise After Ink Installation
- Software Installation Problems
- Control Panel Setup Problems

**Parent topic:** Solving Problems

### Noise After Ink Installation

If you hear noises from your product after installing ink, try these solutions:

- Make sure you removed the foam and plastic protective materials from inside the product.
- The first time you install ink cartridges, the product must prime its print head. Wait until priming finishes before you turn off the product, or it may prime improperly and use excess ink the next time you turn it on. Your product is finished priming the print head when the power light stops flashing.
- If the product's print head stops moving or making noise, and the charging process has not finished after 15 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

**Parent topic:** Solving Setup Problems

### Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and the USB cable or network cable is securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the **Start Here** sheet. Also make sure your system meets the requirements for your operating system.
• Close any other programs, including screen savers and virus protection software, and install your product software again.
• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

Cannot Print Over a Network
Cannot Scan Over a Network
Printing a Network Status Sheet

Parent topic: Solving Problems
Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

• Make sure to place your product within contact range of your router or access point.

  Note: Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

• Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

• Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.

• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

  Parent topic: Solving Network Problems

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.

• If necessary, reinstall your product software and try running EpsonNet Setup again.

  Parent topic: Solving Network Problems

  Related concepts
  When to Uninstall Your Product Software
Product Does Not Appear in Mac OS X Printer Window

If your product does not appear in the Mac OS X printer window, try these solutions:

• Turn your product off, wait 30 seconds, then turn it back on again.
• If you are connecting the product via EpsonNet setup and the WiFi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

Parent topic: Solving Network Problems

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your product is turned on.
• Make sure you install your product’s network software as described in your product documentation.
• Print a network status sheet and verify that the network settings are correct. If the network status is Disconnected, check any cable connections and turn your product off and then on again.
• If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
• Make sure your computer and product are both using the same wireless network.
• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point.

Note: Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

• If you are connecting the product via EpsonNet setup and the WiFi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

Parent topic: Solving Network Problems

Related tasks
Printing a Network Status Sheet

Cannot Scan Over a Network

If you cannot start Epson Scan for scanning over a network, try these solutions:

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.
• If network communication was interrupted while starting Epson Scan, exit Epson Scan, wait a few seconds, and restart it. If Epson Scan cannot restart, turn off your product, turn it back on, and try restarting Epson Scan again.

• Make sure the option selected as the **Timeout Setting** in the Epson Scan Setting program is long enough to complete scanning over a network. See Epson Scan Help for details.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

**Note:** Epson Scan is not available for Mac OS X 10.6 or 10.7.

**Parent topic:** Solving Network Problems

**Solving Paper Problems**

Check these sections if you have problems using paper with your product.

- **Paper Feeding Problems**
- **Paper Jam Problems Inside the Product**
Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• If paper does not feed for printing, remove it from the tray or cassette. Reload it against the right side, then adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette.

• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

• Do not load more than the recommended number of sheets.

• If paper jams when you print on both sides of the paper, try loading fewer sheets.

• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the cassette printable side down.
  • Do not load binder paper with holes in the cassette.
  • Follow any special loading instructions that came with the paper.

- Paper Jam Problems in the Duplexer

**Paper Jam Problems in the Duplexer**

If paper has jammed in the duplexer (rear unit), try these solutions:

1. Cancel the print job from your computer, if necessary.
2. Press the buttons on the sides of the duplexer and remove it.
3. Carefully remove the jammed paper.

4. If paper is jammed in the duplexer, remove the paper as shown.
5. Press the buttons on the duplexer as you press it into place on your product.

6. Press one of the Start buttons to resume printing.

Placing Originals in the Automatic Document Feeder

Document Jams in the Automatic Document Feeder
If you have problems with document jams in the automatic document feeder (ADF), try these solutions:
1. Remove your originals from the ADF.
2. Open the ADF cover.
3. Remove any jammed pages.
Caution: Do not remove pages jammed inside the ADF without opening the cover or you could damage the ADF.

4. Leave the ADF cover open, then raise the document cover.

5. Remove any jammed pages.
6. Lower the document cover.
7. Raise the ADF input tray.

8. Carefully remove the jammed pages.
9. Lower the ADF input tray and reload your originals.

**Caution:** Make sure you do not load the ADF beyond its capacity for your paper size. Also make sure the originals you load are not bent, folded, or curled and do not have tape, staples, or other materials that could obstruct the feeder.

10. Follow the prompts on the LCD screen to clear any error messages.

**Parent topic:** Solving Paper Problems

**Related tasks**

- Placing Originals in the Automatic Document Feeder

**Paper Ejection Problems**

If you have problems with paper ejecting properly, try these solutions:

- If paper does not eject fully, you may have set the wrong paper size. Cancel printing to eject the paper. Select the correct paper size when you reprint.
- If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting when you reprint.
Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on.
- Make sure any interface cables are connected securely at both ends.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
- In Windows, make sure your product is selected as the default printer.
- In Windows, clear any stalled print jobs from the Windows Spooler:

  - **Windows 7**: Click 🔄 and select Devices and Printers. Right-click your product name, select See what's printing, right-click the stalled print job, click Cancel, and click Yes.
• **Windows Vista**: Click and select **Control Panel**. Click **Printer** under **Hardware and Sound**, right-click your product name, select **Open**, right click the stalled print job, click **Cancel**, and click **Yes**.

• **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware** if necessary, and select **Printers and Faxes**.) Right-click your product name, select **Open**, right-click the stalled print job, click **Cancel**, and click **Yes**.

**Related tasks**

Running a Product Check

### Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:

   • **Windows 7**: Click and select **Devices and Printers**.

   • **Windows Vista**: Click , select **Control Panel**, and click **Printer** under **Hardware and Sound**.

   • **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware** if necessary, and **Printers and Faxes**.)

2. Right-click your product name, and select **Printing Preferences**.

3. Click the **Maintenance** tab.

4. Click the **Extended Settings** button.

5. Select **Enable EPSON Status Monitor 3**.

6. Click **OK** to close the open program windows.

**Parent topic:** Solving Problems Printing from a Computer

### Error After Cartridge Replacement

If you see an error light or error message after you replace an ink cartridge, try this solution:

1. Remove and reinsert the ink cartridge you replaced, making sure to push it all the way into its slot.

2. Complete the ink cartridge installation steps.

Replacing Ink Cartridges and Maintenance Boxes

Printing is Slow

If printing becomes slow, try these solutions:

• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.

• Clear space on your hard drive or run a defragmentation utility to free up existing space.

• Close any programs you are not using when you print.

• If your product is connected to a USB hub, connect it directly to your computer instead.

• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Make sure the paper type setting matches the type of paper you loaded.

• Turn on any high speed settings in your product software.

• Select a lower print quality setting.

• **Windows**: Click the **Maintenance** tab, select **Extended Settings**, and select the following settings:
  
  • **High Speed Copies**
  
  • **Always spool RAW datatype**
  
  • **Page Rendering Mode**
  
  • **Print as Bitmap**

Slanted Printout

Parent topic: Solving Problems

Inverted Image

If your printed image is inverted unexpectedly, try these solutions:

- Turn off any mirror or inversion settings in your printing application.
- Turn off the Mirror Image, Flip horizontally, or Reverse page orientation settings in your printer software. (This option has different names, depending on your operating system version.)

Note: Leave these options turned on when you print on transfer paper, if available for your product.

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

• Make sure your paper is not damp, curled, old, or loaded faceup in the cassette (the printable side should be facedown).
• Make sure your paper is not loaded facedown in the rear MP tray (the printable side should be faceup).
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the Print Density and/or Ink Drying Time settings.
• Clean the print head.
• Align the print head.
• Clean the paper path.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

**Parent topic:** Solving Problems

**Related topics**

- Solving Print Quality Problems

**Image Consists of a Few Dots Only**

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan **Black & White** setting, adjust the **Threshold** setting and scan again.

**Parent topic:** Solving Scanned Image Quality Problems

**Related tasks**

- Cleaning Your Product

**Line of Dots Appears in All Scanned Images**

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

**Caution:** Do not spray glass cleaner directly on the scanner glass.
Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

Related topics

Placing Originals on the Product

Image is Distorted or Blurry

If a scanned image appears distorted or blurry, try these solutions:

• Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.

• Do not move your original or your product during scanning.

• Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

• Adjust these Epson Scan settings (if available) and try scanning again:

  • Select the Unsharp Mask setting.
  • Adjust the Auto Exposure setting.
  • Increase the Resolution setting.

Related topics

Selecting Epson Scan Settings

Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Related topics

Solving Scanned Image Quality Problems
Image is Too Dark
If your scanned image is too dark, try these solutions:
• Adjust these Epson Scan settings (if available) and try scanning again:
  • Auto Exposure
  • Brightness
  • Histogram Adjustment
• Check the brightness and contrast settings of your computer monitor.

Back of Original Image Appears in Scanned Image
If an image from the back of a thin original appears in your scanned image, place a piece of black paper on the back of the original and scan it again.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:
• Select the Descreening setting.
• Select a lower Resolution setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Scanned Image Colors Do Not Match Original Colors
Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.
To adjust the colors in your scanned image, adjust these Epson Scan settings (if available) and try scanning again:

- Change the **Image Type** setting and experiment with different combinations of the next settings.
- Adjust the **Tone Correction** setting.
- Adjust the **Auto Exposure** setting.

**Parent topic:** Solving Scanned Image Quality Problems

**Cannot Send or Receive Faxes**

263
Cannot Receive Faxes with a Telephone Connected to Your Product

Parent topic: Solving Problems

Cannot Send or Receive Faxes
If you cannot send or receive faxes, try these solutions:

• Make sure the recipient's fax machine is turned on and working.
• Make sure paper is loaded correctly in your product.
• Make sure **Auto Answer** mode is turned on to receive faxes automatically. Check your product control panel to see if this mode is turned on.
• Check that the cable connecting your telephone wall jack to your product's **LINE** port is secure.
• Print a fax connection report using your product control panel or fax software to help diagnose the problem.
• Verify that the telephone wall jack works by connecting a phone to it and testing it.
• If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
• If your telephone line has static, turn off your product's **V.34** and **ECM** (Error Correction Mode) fax communication settings and try faxing again.

**Note:** If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Click or Start, and select All Programs or Programs.
4. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

**Note:** If you see a User Account Control window, click Yes or Continue.

5. In the next window, select your product and click OK. Then follow any on-screen instructions.
6. Open the Windows Control Panel utility.
7. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:

   - **Windows 7 or Windows Vista:** Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.
• Windows XP: Double-click Add or Remove Programs. Select Epson Event Manager and click Change/Remove.

8. Do one of the following to uninstall Epson Scan, then follow any on-screen instructions:
   • Windows 7 or Windows Vista: Select Epson Scan and click Uninstall/Change.
   • Windows XP: Select Epson Scan and click Change/Remove.

9. Restart your computer, then see the Start Here sheet to re-install your software.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: When to Uninstall Your Product Software

Uninstalling Product Software - Mac OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstall Center utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstall Center utility, visit the Epson download site (U.S. downloads or Canadian downloads).
2. Extract the contents of the zip file you downloaded onto your hard drive.
3. Quit all applications currently running on your Mac.
4. Open the Applications > Epson Software folder.
5. Double-click the Uninstall Center icon.
6. Select the checkbox for each software program you want to uninstall.
7. Click Uninstall.
8. Follow the on-screen instructions to uninstall the software.
9. To reinstall your product software, see the Start Here sheet for instructions.

Note: If you uninstall the printer driver and your product name remains in the Print & Fax or Print & Scan window, select your product name and click the – (remove) icon to remove it.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support
Visit Epson’s support website at www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:

• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer configuration
• Description of the problem

Then call:

• U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories
You can purchase genuine Epson ink and paper at Epson Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Ink Cartridge Specifications

**Note:** We recommend that you use genuine Epson maintenance boxes and cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

Part of the ink from the included set of cartridges is used for priming the printer. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

**Color**
Black, Cyan, Magenta, Yellow

**Cartridge life**
Opened package: 6 months
Unopened package: do not use if the date on the package has expired

**Temperature**
Storage: –4 to 104 °F (–20 to 40 °C)
1 month at 104 °F (40 °C)
Ink freezes at 8.6 °F (–13 °C)
Ink thaws and is usable after 3 hours at 77 °F (25 °C)

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

Safety and Approvals Specifications

United States
- Safety: UL60950-1
- EMC: FCC part 15 Subpart B class B

Canada
- Safety: CAN/CSA C22.2 No. 60950-1
- EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
- Manufacturer: Marvell Semiconductor Inc.
- Type: SP88W8786-MD0-2C2T00

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

FCC Compliance Statement

For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the back side is a label that contains, among other information, the FCC registration number and the ringer equivalence number (REN) for this equipment. You must, upon request, provide this information to your local telephone company. The information associated with the services the equipment is to be connected are REN: 0.1B, Jack type: RJ-11C.

The REN is useful to determine the quantity of devices that you may connect to your telephone line and still have all of those devices ring when your telephone number is called. In most, but not all areas, the sum of the RENs of all devices connected to one line should not exceed five (5.0). To be certain of the number of devices that you may connect to your line, you may want to contact your local telephone company to determine the maximum REN for your calling area. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US: BKMFA01BC451C. The digits represented by 01 are the REN without a decimal point (e.g., 01 is a REN of 0.1). For earlier products, the REN is separately shown on the label.

This equipment may not be used on coin service provided by the telephone company. Connection to party lines is subject to state tariffs.

Should this equipment cause harm to the telephone network, the telephone company may discontinue your service temporarily. If possible they will notify you in advance that temporary discontinuance of service may be required. But if advanced notice isn’t practical, the telephone company will notify you as soon as possible. You will be informed of your right to file a complaint with the FCC. The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the proper functioning of your equipment. If they do, you will be notified in advance to give you an opportunity to maintain uninterrupted telephone service.
This product is not intended to be repaired. If you experience trouble with this equipment, please contact:

Name: Epson America, Inc.
Address: 3840 Kilroy Airport Way, Long Beach, CA 90806 U.S.A.
Telephone: (562) 981-3840

The telephone company may ask that you disconnect this equipment from the network until the problem has been corrected or until you are sure that the equipment is not malfunctioning.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. In order to program this information into your fax machine, follow the instructions for entering fax header information.

According to the FCC's electrical safety advisory, we recommend that you may install an AC surge arrestor in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment Model C451C does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

**WARNING**
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

**For Canadian Users**

1. This product meets the applicable Industry Canada technical specifications.
2. The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

This Class B digital apparatus complies with Canadian ICES-003.

Le présent matériel est conforme aux spécifications techniques applicables d’Industrie Canada.

L’indice d’équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d’une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d’indices d’équivalence de la sonnerie de tous les dispositifs n’excède pas 5.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
