System Requirements

To use the WorkForce T42WD and its software, your computer system should meet these requirements:

Windows Requirements

- Microsoft® Windows® 7, Windows Vista®, Windows XP Professional x64 or Windows XP
- USB 1.1 port (minimum) or USB 2.0 port (recommended)

Mac OS X Requirements

- Mac OS® X 10.4.11, 10.5.8 o 10.6.x
- USB 1.1 port (minimum) or USB 2.0 port (recommended)

Nota: Visit the Epson technical support website at www.latin.epson.com for the latest in compatibility and drivers (website available in Spanish and Portuguese only).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions:

- Be sure to follow all warnings and instructions marked on the product.
- Use only the type of power source indicated on the product label.
- Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment. Make sure the power cord meets all relevant local safety standards.
- Place the product near a wall outlet where the plug can be easily unplugged.
- If you won't be using the product for a long period, unplug the power cord from the electrical outlet.
- Always turn off the product using the  power button, and wait until the  power light stops flashing before unplugging the product or cutting off power to the electrical outlet.
- Avoid plugging the product into an outlet on the same circuit as a photocopier or air conditioning system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.

- Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end. If damage occurs to the plug, replace the cord or consult a qualified electrician.
- If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.
- Avoid placing the product in locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust. Do not place the product near a radiator or heating vent or in direct sunlight. Do not place or store the printer outdoors.
- Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless phones.
- Allow space behind the printer for the cables, and space above the printer so that you can fully raise the document cover.
- Leave enough room around the product for sufficient ventilation. Make sure the product is at least 4 inches (10 cm) away from the wall.
- Do not block or cover openings in the product case or insert objects through the slots.
- Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.
- Be careful not to trap your fingers when closing the printer cover.
- Do not touch the flat white cable inside the product.
- Do not spill liquid on the product. Do not use the product near water. Do not use with wet hands.
- Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance.
- Adjust only those controls that are covered by the operating instructions. Except as specifically explained in your documentation, do not attempt to service the product yourself.

- Never disassemble, modify, or attempt to repair the product by yourself, except as specifically explained in the documentation. Do not adjust controls that are not covered by the operating instructions.
- When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak from the cartridges.
- Always keep this guide handy.

Wireless Network Safety

- Do not use this product inside medical facilities or near medical equipment. Radio waves from the product may adversely affect the operation of medical equipment.
- Keep this product at least 9 inches (22 cm) away from cardiac pacemakers. Radio waves from this product may adversely affect their operation.
- Do not use this product near automatically controlled devices such as automatic doors or fire alarms. Radio waves from this product may adversely affect these devices.

Ink Cartridge Safety

- Keep ink cartridges out of the reach of children and do not drink the ink.
- Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water. If you still have discomfort or vision problems, see a doctor immediately.
- Do not put your hand inside the product or touch any cartridges during printing.
- Do not try to move the print head by hand, or you may damage the product.
- Before transporting the product, make sure the print head is in the home (far right) position and the ink cartridges are in place.
- Install ink cartridges immediately after you remove them from their packages. Leaving cartridges unpacked for a long time before using them may prevent the product from printing.
- Do not shake ink cartridges after opening their packages, and do not remove the label from the cartridge itself; this can cause leakage.
- If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area. Do not store cartridges upside down.

Declaration of Conformity

According to 47CFR, Part 2 and 15, Class B Personal Computers and Peripherals; and/or CPU Boards and Power Supplies used with Class B Personal Computers

We: Epson America, Inc.
Located at: 3840 Kilroy Airport Way
MS: 3-13
Long Beach, CA 90806
Telephone: (562) 290-5254

Declare under sole responsibility that the product identified herein, complies with 47CFR Part 2 and 15 of the FCC rules as a Class B digital device. Each product marketed, is identical to the representative unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on a statistical basis as required by 47CFR §2.909. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Trade Name: Epson
Type of Product: Printer
Model: B461A
Marketing Name: WorkForce T42WD

Limited Warranty

1. Limited Warranty for Epson Products

Epson products are covered by warranty against defects in workmanship and materials when operated under normal use and handling conditions, as indicated in the product documentation, for the period specified in section “Limited Warranty Coverage”. Coverage begins as of the date of delivery to the purchaser by Epson or by an authorized Epson dealer (see “Epson Subsidiaries and Offices in Latin America”), in the country of purchase.

Epson also guarantees that the consumables (ink cartridges, toner, batteries) included with the product, will perform according to the usage specifications as long as they are used prior to the expiration of their warranty period.

2. Scope of Warranty

Should Epson receive notice of a defect during the warranty period, it may, at its discretion, repair or replace the defective product at no cost to the purchaser. In the event of a replacement, the replaced equipment will become property of Epson. The replaced item may be new or previously repaired to the Epson standard of quality, and will assume the remaining warranty period of the product that was originally purchased.

This warranty does not include any compensation or damages whatsoever, resulting from the operating failures of the Epson product. In any event, Epson's maximum liability toward the purchaser will be limited to the purchase price paid to Epson or to the authorized dealer.

Epson's warranty does not cover any software not manufactured by Epson, even when delivered with an Epson product. The software may have a warranty provided by the manufacturer, as indicated in the documentation attached thereto.

3. Limitations and Exclusions

The warranty will be invalid in the following cases:

- 3.1 When the product's serial number has been removed or altered.
- 3.2 When the product has been misused, has undergone unauthorized modifications, has been used or stored in ways that are not in compliance with the environmental specifications of the product.
- 3.3 When the damage resulted from the use of refilled supplies or consumables, or when damages are the result of use of media that does not meet the product's specifications.
- 3.4 When damages resulted from the inappropriate transport of the equipment (packaging, installation, maintenance, transportation).
- 3.5 When damages were caused by natural or intentional disasters (fire, floods, lightning, earthquakes, etc.), power surges, or interaction with other brand products.
- 3.6 When the product has been totally or partially disassembled, or has been repaired other than by an Epson Authorized Service Center.
- 3.7 When substances have been spilled on the product.
- 3.8 When the external plastic case has been scratched or abused.
- 3.9 When damages resulted from inappropriate tests, installation, maintenance or adjustments.

The warranty does not extend to accessories (lids, covers, trays) or replenishing supplies and consumables (ink cartridges, toner, ink ribbons, batteries, photosensitive units, knobs, print heads, lamps), which, due to their nature, must be regularly purchased through authorized dealers.

4. How to Obtain Warranty Service

Please refer to the user documentation to ensure that the product settings have been properly set and to perform the diagnostic tests indicated therein. Furthermore, in order for the unit to operate optimally, always use original Epson supplies and consumables.

To obtain warranty service, the purchaser may take the product to any Authorized Epson Service Center, along with proof of purchase, or call any of the Epson Technical Assistance Centers (see country list starting on page 8).

Upon calling an Authorized Epson Service Center, the purchaser will be asked to provide the product model and serial numbers, and may be asked to provide information on the location and the date of purchase (the warranty is only valid in the country of purchase).

If there are no Authorized Service Centers in your area, call the Technical Assistance Center for service referral.

5. Responsibilities of Purchaser

The purchaser is responsible for the safety of all confidential and proprietary information stored on the product, as well as for recovery backup files in case of damage. Any activity related with the re-installation or resetting of the software that was delivered with the equipment, will be billed to the purchaser at the rates in effect at the Epson Service Center. This also applies if the failure was the result of a defect in the purchaser’s proprietary software or of a computer “virus”.

In order to obtain on-site service, the latter will be required to provide: access to the product; an appropriate working area; access to electrical facilities; access to the resources that may be necessary for the installation, repair or maintenance of the unit; a safety environment for Epson staff and their work tools.

6. Limited Warranty Coverage

Product	Model	Coverage	Conditions
Ink Jet Printer	WorkForce	One year	Service center

Technical Support Service

Epson offers technical assistance through electronic and telephone services. Before calling Epson, refer to the documentation included with your product. If you do not find the solution to your problem, visit Epson’s website at: www.latin.epson.com or call the local Epson office or an authorized dealer.

Service Centers
